

National Summary Data Page

Last update:19.09.2019

The National Summary Data Page provides a quick access to a single comprehensive source of economic and financial data released for the Slovak Republic in the International Monetary Fund's standard SDDS Plus (Special Data Dissemination Standard Plus). It also comprises links to web sites of the Statistical Office of the Slovak Republic, the National Bank of Slovakia and the Ministry of Finance of the Slovak Republic with data released for data categories produced by the respective authority mentioned above. At the same time, the site gives access to metadata for individual data posted on the International Monetary Fund's Dissemination Standards Bulletin Board (DSBB). For more information about DSBB and the Special Data Dissemination Standard Plus, to which the Slovak Republic has committed, please, click on [DSSB Home Page](#).
