The number of visitors to Slovakia's hotels and guesthouses in January 2024 remained below 400 000 guests for the third consecutive month

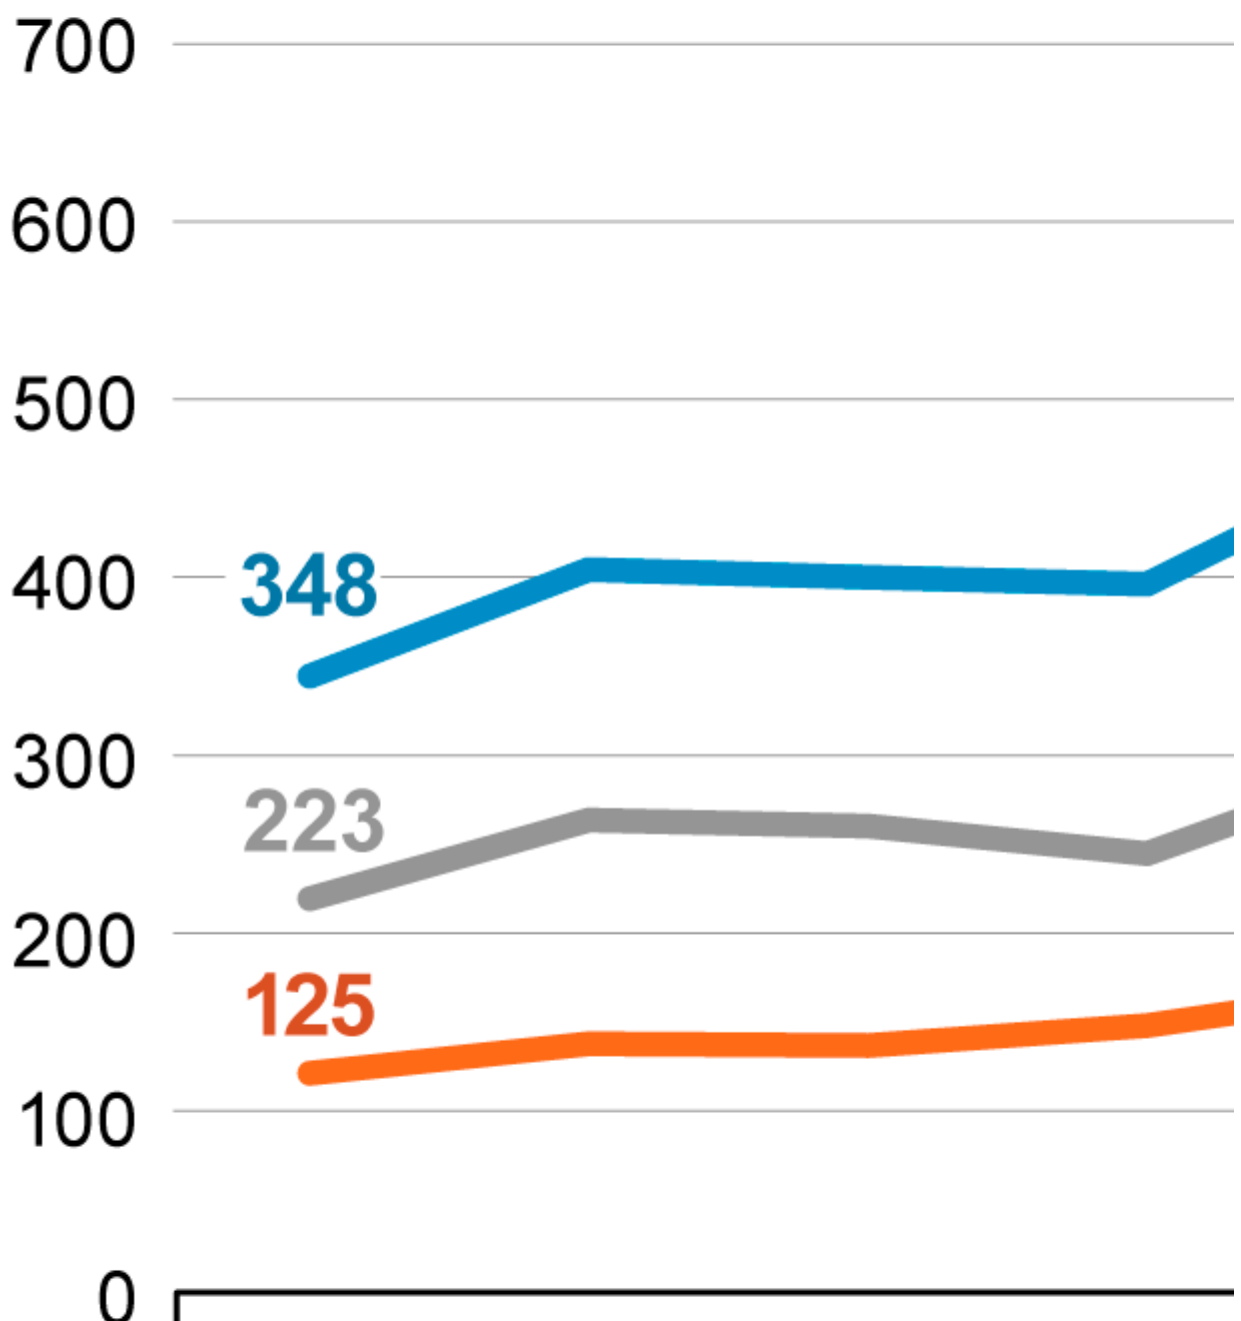

Visit rate increased slightly year-on-year. However, it was far from reaching the values from the record pre-Covid January 2020, the number of guests was still lower by a fifth. Accommodation providers in Žilinský kraj approached the most the figures of January 2020, but the majority of regions registered a double-digit decrease.

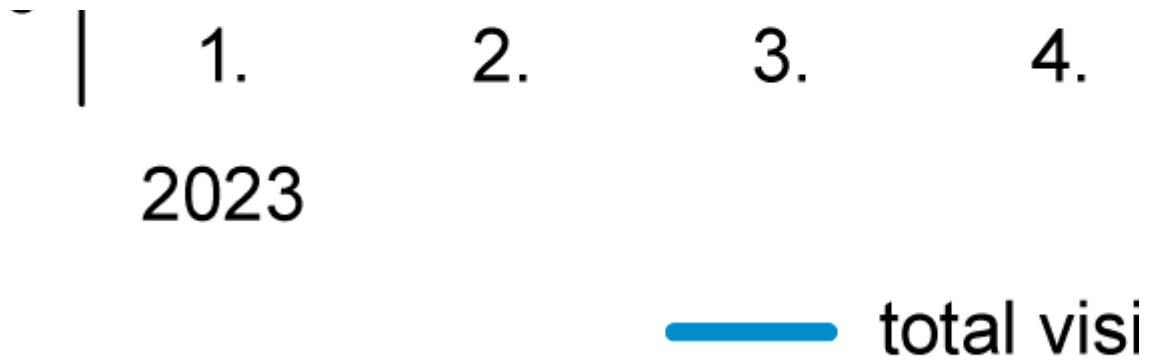

374 000 guests visited tourism accommodation establishments in Slovakia in January of this year, which was by 8% more than in the corresponding period last year. The achieved visit rate almost equaled the values of the touristically successful year 2019, but the accommodation providers still lacked 17% of visitors to the values of the record January 2020.

Guests spent almost 11% more nights in hotels and guesthouses than a year ago, their number exceeded 958 thousand, the average length of stay in January was 2.6 nights.
