Annex – Tourism August 2023 (ZIP – 40 kB)

The strongest month of this year attracted more than 700 thousand visitors to hotels and guesthouses in Slovakia

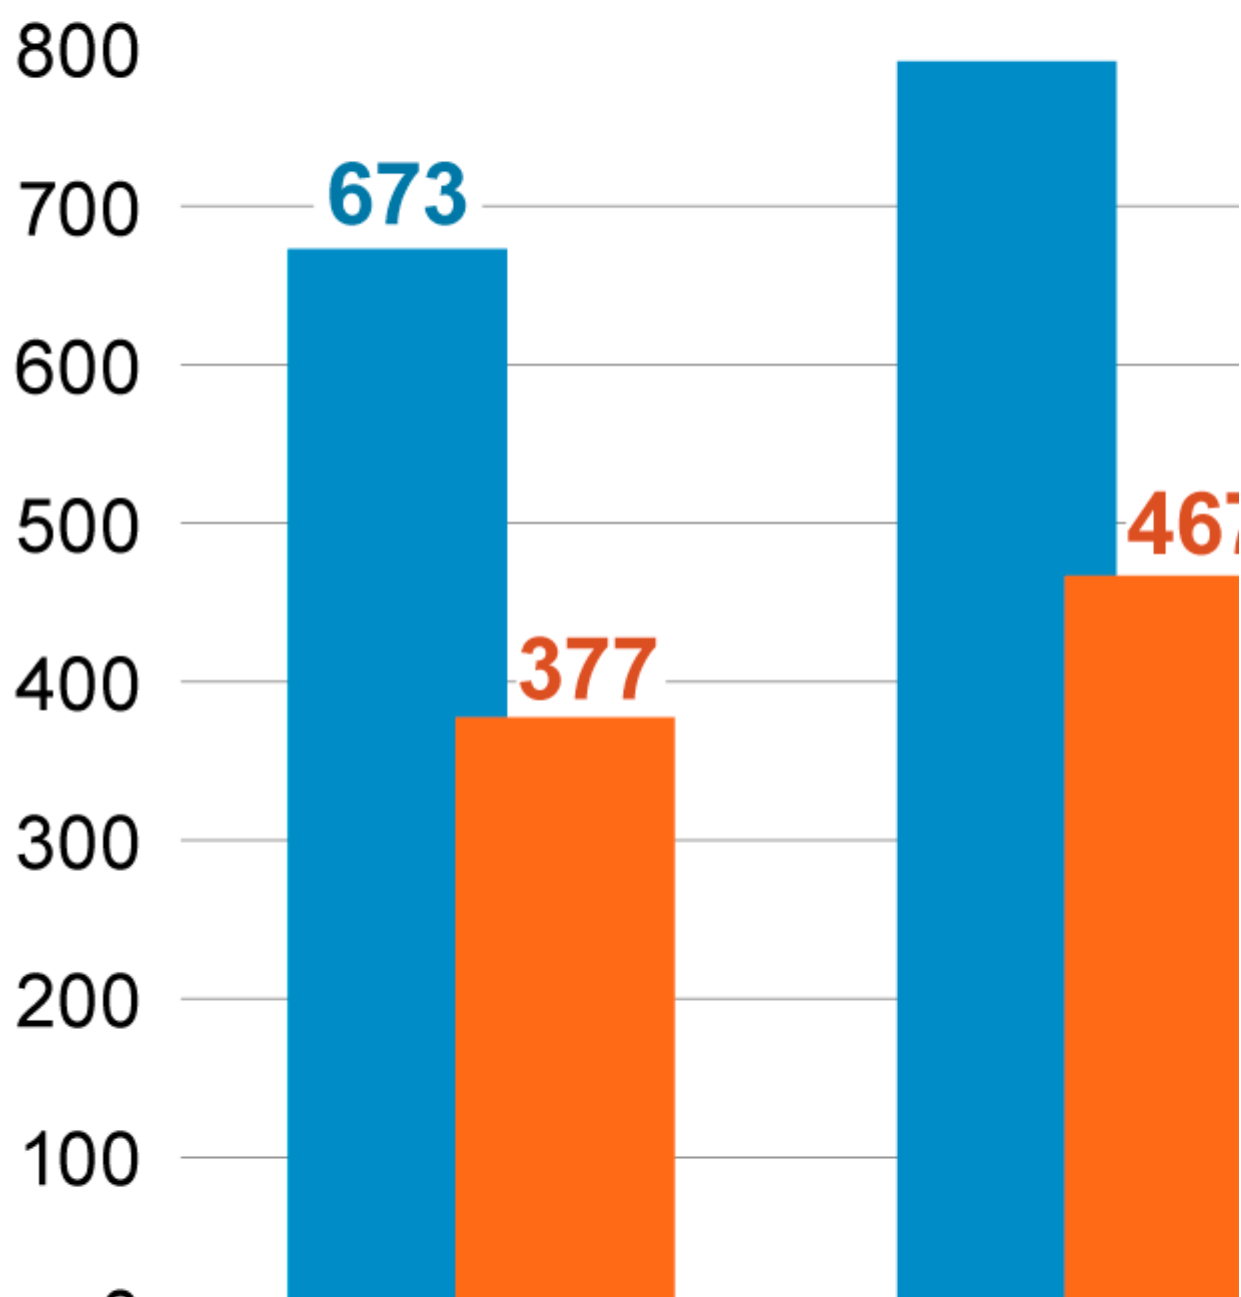

The peak of the holiday season in Slovakia was marked by a year-on-year stagnation in the number of domestic guests and a dynamic growth of the number of foreigners. The number of foreign visitors rose in all regions, though they did not reach the pre-Covid level in any of them. Even the most-visited regions by tourists coped with a slight year-on-year decrease in the number of domestic visitors.

Almost 707 000 guests visited tourist accommodation establishments in Slovakia in the second holiday month, which is only less than 7% more than last year. In the normally strongest period of the year, accommodation providers still lacked 86 000 (11%) visitors to the record visit rate in August 2019. The number of overnight stays that guests spent in hotels, guesthouses and other accommodation establishments in Slovakia reached almost 2.1 million nights. It is approximately more than one tenth than a year ago. The average length of stay was 2.9 nights.

The increase in accommodation indicators is still mainly influenced by the lower comparative base from August 2022, when guests gradually returned to accommodation establishments after the two-year COVID-19 pandemic.
