In July, the number of foreign guests in hotels and guesthouses rose again, in Žilinský kraj they exceeded the numbers before the pandemic

The total number of guests in hotels and guesthouses in Slovakia increased year-on-year even in July, but it was still not possible to reach the number of visitors from July 2019. Domestic guests in 3 out of 8 regions decreased year-on-year, but foreigners returned to Slovakia more significantly. Their number rose by double digits in all regions.

The total number of visitors to hotels, guesthouses and other tourism accommodation establishments in Slovakia in July 2023 reached 661 000 people, which represented a year-on-year increase by 9%. Providers of accommodation still lacked 51 000 (7%) visitors compared to the number of visitors in the successful pre-pandemic year. The number of nights that guests spent in tourism establishments slightly exceeded 2 million, which was by a tenth more than a year ago. The average length of stay was 3 nights.

The increase in accommodation indicators is still mainly influenced by the lower comparative base from July 2022, when guests gradually returned to accommodation establishments after the two-year COVID-19 pandemic.
