Turnover in industry started to increase again, the most significant growth was recorded in selected market services

April's turnover increased in 4 out of 5 monthly monitored sectors of the economy. Industry's turnover rose for the first time this year, by almost double digits, selected market services reached the ten percent mark. Turnover in transportation and storage, as well as in information and communication, increased. Only turnover in construction remained in negative values.

Industry¹⁾²⁾, as the largest sector of the economy, increased by 9.1% year-on-year (in constant prices) in April 2024, increasing again after five months of decline. Among the 16 monitored industrial sectors¹⁾, 11 recorded higher turnover values.

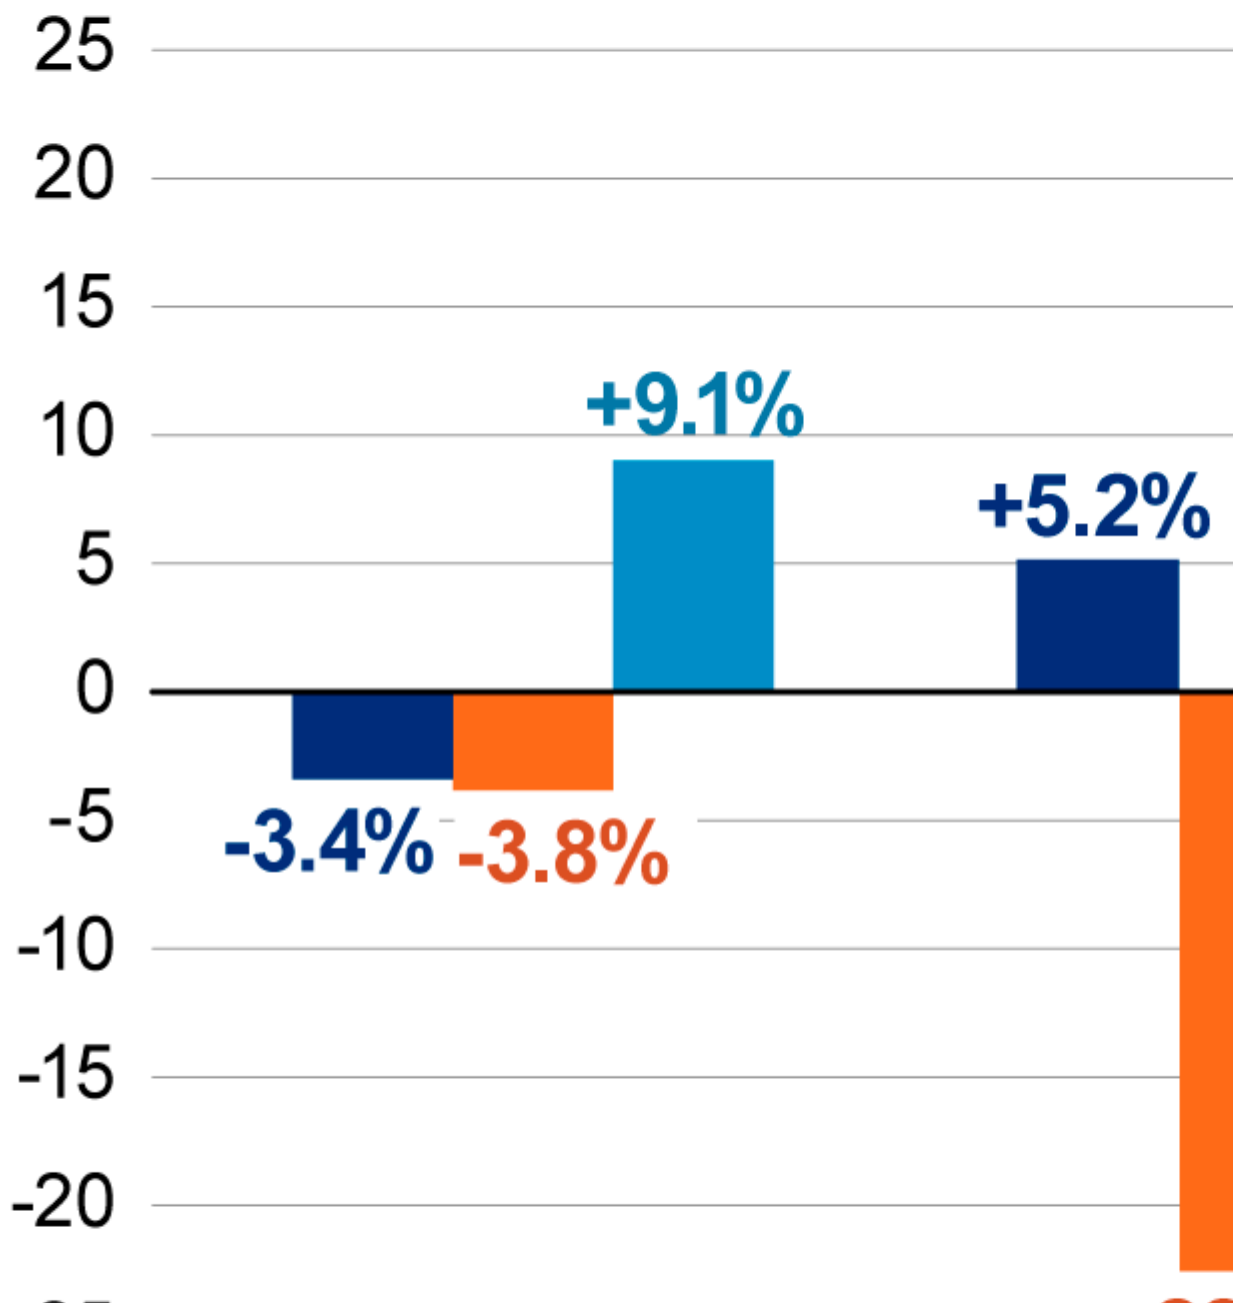

April's turnover in **selected market services**²⁾ increased by 10% year-on-year, which almost doubled their growth compared to March 2024. In **transportation and storage enterprises**, after the stagnation in March, the turnover growth was activated again and increased by 7.1% year-on-year.

In April, **turnover of construction enterprises**²⁾ decreased by 0.4% year-on-year, which was the slowest rate of decline in the last eight months.

Turnover in **information and communication activities**²⁾ rose by 8.3% year-on-year, so after a significant slowdown in March, it stabilized their growth rate again in April 2024.
