

Catalogue of Publications

Last update: 19.01.2026

The Statistical Office of the SR publishes statistical products through extensive, comprehensive thematic and collective works – publications. The basic information about their titles, content, and language versions is provided in the [Catalogue of publications 2026](#), which is now available on a dedicated website. The new electronic format is more modern and user-friendly.

All previously published publications are available in the main section [Publications of the Catalogues](#), while older editions can be found in the [Archive](#).

In previous years, the editorial plan was published in book form; for example, see the [Catalogue of publications 2024](#).
