

European Statistical Training Programme (ESTP)

Last update:06.06.2018

European Statistical Training Programme provides European statisticians with the opportunity to participate in international training courses, workshops and seminars at postgraduate level.

Courses under the European Statistical Training Programme have an international dimension. Their aim is to acquaint the participants with the challenges so that they would be able to tackle comparable statistical issues at European and international level. Courses are focused on European concepts harmonization, legislation and implementation at national level.

The Programme is coordinated by Eurostat. Courses take place either at Eurostat's premises in Luxembourg or in national training sides of the EU or the European Free Trade Association (EFTA) countries.

[The core programme of the ESTP 2018](#) (pdf - 2 MB) is adjusted to meet the requirements of the European Statistical System (ESS) taking into account the different level of statistical knowledge and statistical experiences. It comprises courses in the field of the official statistics, IT programmes, research, development and statistical management.

Through a balanced combination of theory and practice and a variety of approaches (workshops, seminars, lectures and exercises), the trainings intend to provide some adequate solutions and, in some cases, they simulate a real working situation.

Who may apply?

Officials and employees of the National Statistical Offices or corresponding competent national authorities of the EU Member States, the European Free Trade Association countries, candidate countries and potential candidate countries. Occasionally, and on a really rare cases the applicants from other administrative bodies, international organizations, non-European statistical offices can individually apply.
