### Wage growth slowed down in June, the drop in real wages was perceived by employees in market services and in construction

Wage growth slowed down in June, real wages increased year-on-year in 8 sectors, while they dropped in market services and in construction. 6 out of 10 sectors had more employees than a year ago, with the largest increase in accommodation.

Compared to last year, real wages increased in 8 of the 10 sectors monitored monthly, most notably in retail trade. In real terms, employees in selected market services and in construction earned less. 6 out of 10 sectors had more employees than a year ago, with the largest increase in accommodation.

The average nominal monthly wage<sup>1,2)</sup> in June 2024 increased year-on-year in all 10 sectors monitored monthly. It rose at a double-digit rate only in retail trade by 11.2%. Real wages increased compared to last year in 8 of the 10 sectors monitored monthly, the most in retail trade by 8.9%. A real growth rate by more than 5% was also achieved by wages in sale and repair of motor vehicles, in food and beverage activities, but also in transportation and storage.

At the same time, in the two monthly monitored sectors, nominal growth was no longer enough to keep up with inflation, and the real value of wages decreased year-on-year, namely in selected market services by 1.3% and in construction by 0.7%.
