SLOVAK STATISTICS AND DEMOGRAPHY is the only scientific reviewed journal focusing on the presentation of modern statistical and demographic methods and procedures. Our aim is to promote the position and importance of Slovak statistics in the European Statistical System, cooperation between the Eurostat and the national statistical offices in the field of survey harmonisation and the multi-dimensional character of statistics as well. We support the development of statistical theory and its connection with practice. We aim to contribute to the utility of statistical outputs in various fields and to the improvement of quality and efficiency.

The scientific journal Slovak Statistics and Demography is **published by the Statistical Office of the Slovak Republic**. We publish analytic articles, prognoses, views, discussion contributions, reviews, information and announcements from various statistical fields (national accounts, production statistics, social statistics, environmental statistics etc.) and demography (demographic statistics, theoretical and methodological bases of demography, historical demography etc.) including the population and housing census as an essential part of demographic statistics.

The journal is published **four times a year** in printed and electronic form, always at: **15th January, 15th April, 15th July, 15th October**. Submissions are accepted in Slovak, Czech and English. From 2014 individual copies of the journal are available to readers in electronic form. Titles of articles, keywords and resume of articles are also available in English.
