### **The number of visitors to hotels and guesthouses decreased in April, mainly the foreign guests were absent**

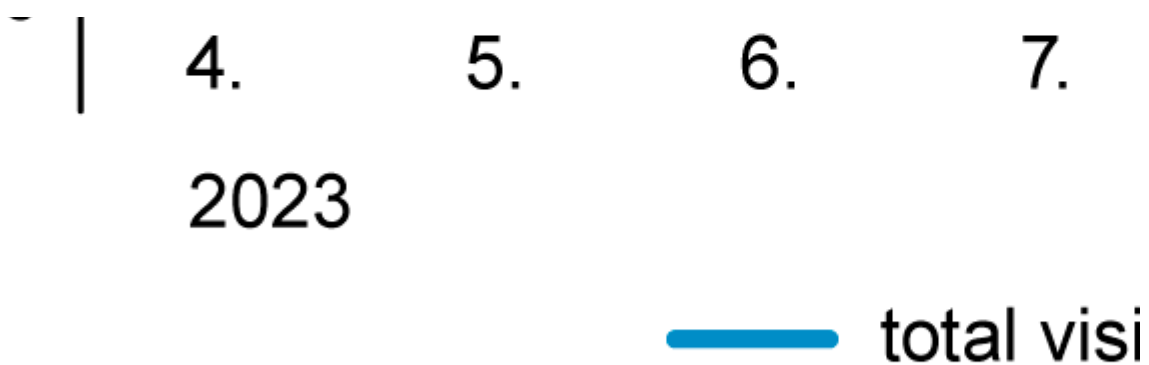

In April, the number of visitors to hotels and guesthouses decreased by 4% year-on-year and was by 13% lower than the values of the successful tourist year of 2019. Only 3 out of 8 regions, namely Košický, Trenčiansky and Banskobystrický kraj, achieved a higher number of guests than last year.

384 000 guests visited tourism accommodation establishments in Slovakia in April this year, which was by 3.9% less than in the corresponding period last year. The year-on-year lower numbers of visitors to hotels and guesthouses in April were also due to the Easter holidays in March, which, unlike last year, did not help accommodation providers to achieve better results. Almost 60 000 visitors were missing from hotels and guesthouses to reach the tourist success of 2019. Guests spent more than 900 000 nights in tourism establishments, the average length of stay in April was 2.4 nights.
