### **Accommodation providers started the holidays with the third best monthly number of visitors since the beginning of the pandemic**

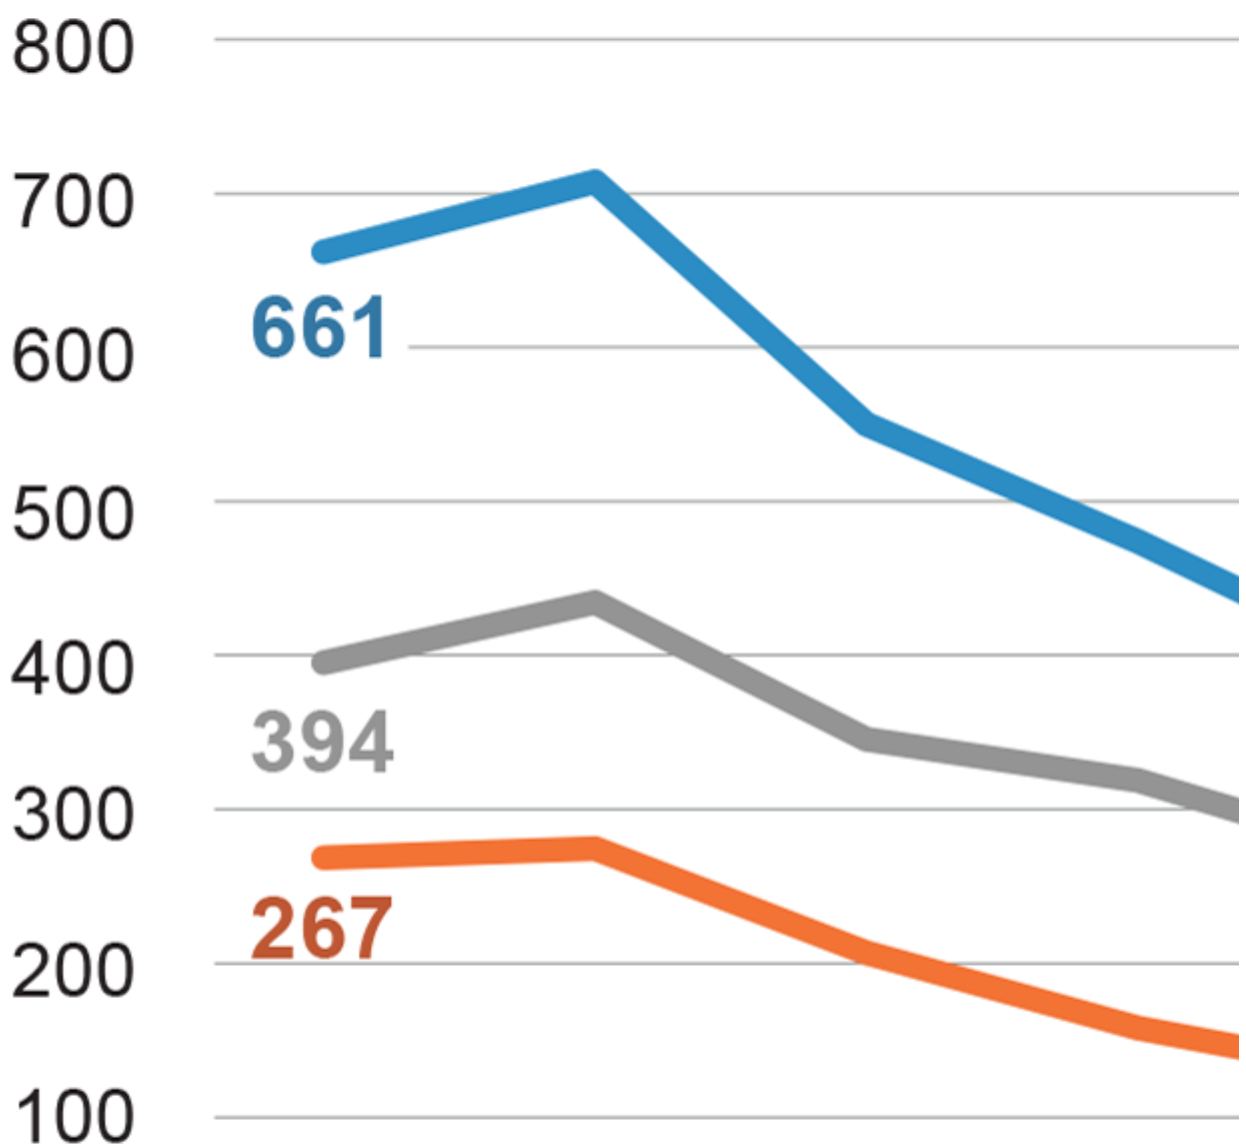

The first holiday month brought more than 675,000 visitors to accommodation establishments in Slovakia, which was more than a year ago. Accommodation providers thus recorded the best July and the third best monthly number of visitors since the beginning of 2020, when the pandemic caused a slump in the tourism industry. 6 out of 8 regions were better off year-on-year, but the number of domestic guests increased in all regions.

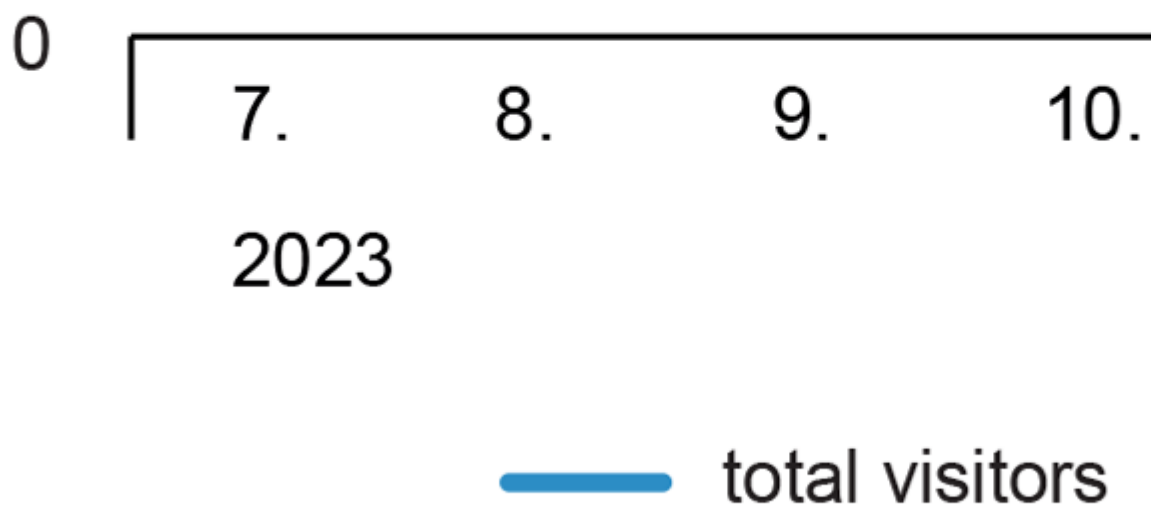

In July, 675,000 guests spent at least one night in hotels, guesthouses and other accommodation establishments in Slovakia, which was by 2.1% more than in the same period last year. In July, it was the highest number of visitors in the last 5 years, i.e. since the period when the entire tourism industry was significantly affected by anti-covid measures. To reach the historically most successful year in 2019, only 5% (37,000) visitors were missing according to accommodation providers. During July, guests spent more than 2 million nights in tourism establishments with an average stay of 3 nights.
