Annex – Tourism September 2023 (ZIP – 65 kB)

After more than three years, the number of visitors to tourist accommodation establishments approached the numbers of the pre-pandemic period

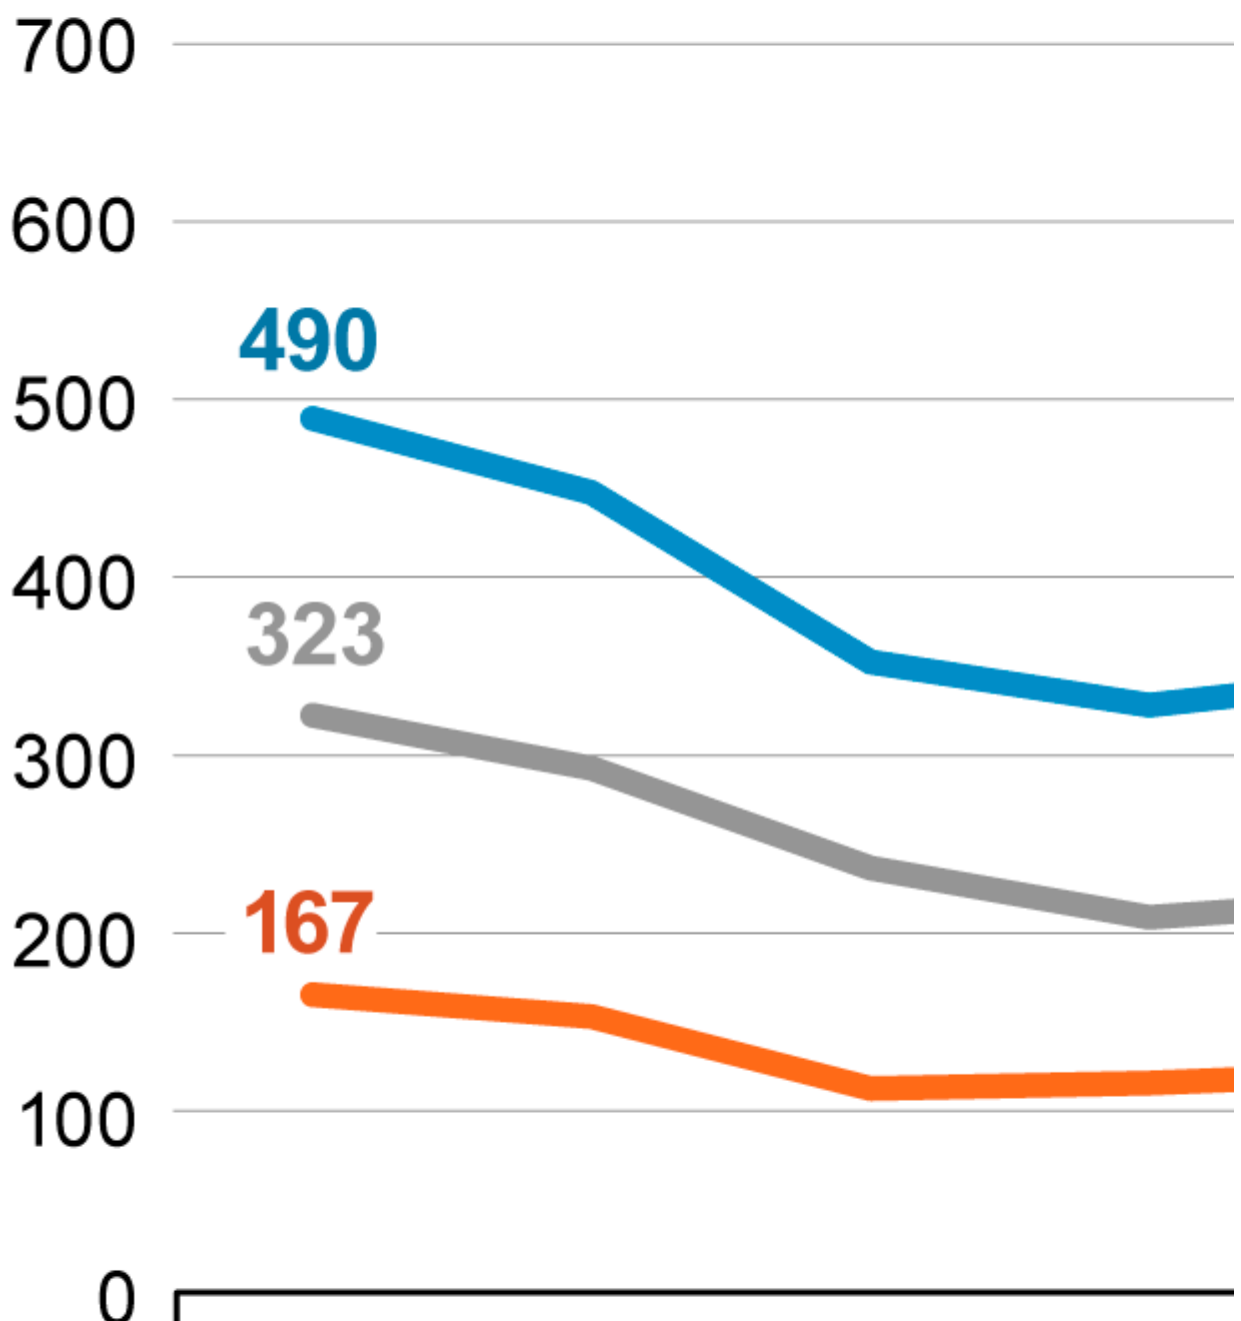

The number of domestic guests in hotels and guesthouses in September 2023 reached the level of the tourist record year 2019. Despite the dynamic year-on-year growth, the number of foreign visitors was still lower by 13% than the in the pre-Covid period.

549 000 guests visited tourist accommodation establishments in Slovakia in September of this year, which is by 12% more than last year. Accommodation providers still lacked only 34 000 (6%) visitors to the successful year 2019. The number of overnight stays that guests spent in hotels and guesthouses increased by a tenth compared to last year and reached almost 1.4 million. The average length of stay was 2.5 nights.

The increase in accommodation indicators is still mainly influenced by the lower comparative base from September 2022, when guests gradually returned to accommodation establishments after the two-year COVID-19 pandemic.
