In June, the domestic production of construction enterprises lagged behind last year, it was prospering only abroad

Construction production in June 2024 decreased by more than 7% year-on-year. The dominant new construction lagged behind, repairs and maintenance of buildings recorded a significant drop. From the perspective of the type of construction, works on engineering constructions slowed down more significantly. Compared to last year, only the production of Slovak builders abroad increased.

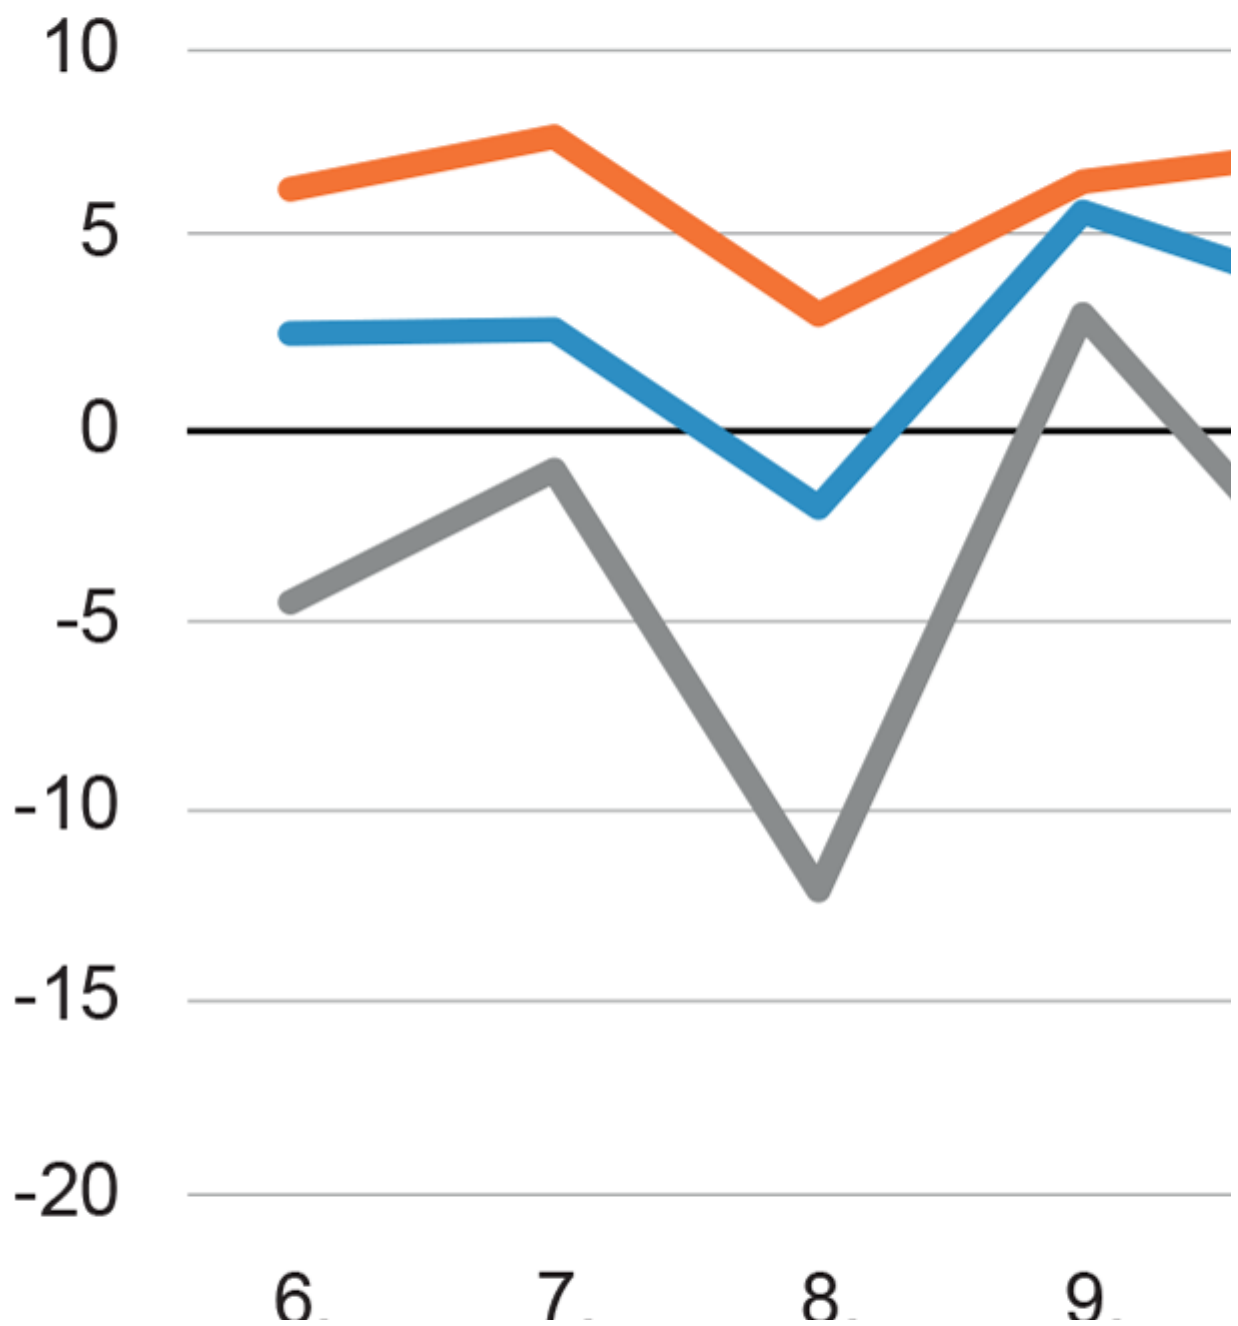

Construction production^{1,2)} in June 2024 amounted to EUR 644.5 million, and it was lower by 7.4%³⁾ than a year ago. After seasonal adjustment, construction production dropped by 0.6% month-on-month.

All components of domestic construction production were affected by the sector's negative result. The dominant **new construction**⁴⁾ dropped by 5.7% year-on-year, but **repairs and maintenance of buildings** decreased more significantly by 15.4% and especially the smallest component – **other construction works** by more than 27%. Domestic construction production represented almost 89% of the total output of the construction industry.
