The balance of trade ended with the second highest surplus this year, exports were higher than imports by EUR 647 million in June

The value of Slovak exports and imports was lower year-on-year for the second consecutive month, while the decline deepened. The significant decrease in exports compared to last year's June was mainly affected by the decrease in the export of cars. Imports decreased due to the lower value of imported motor vehicle parts again.

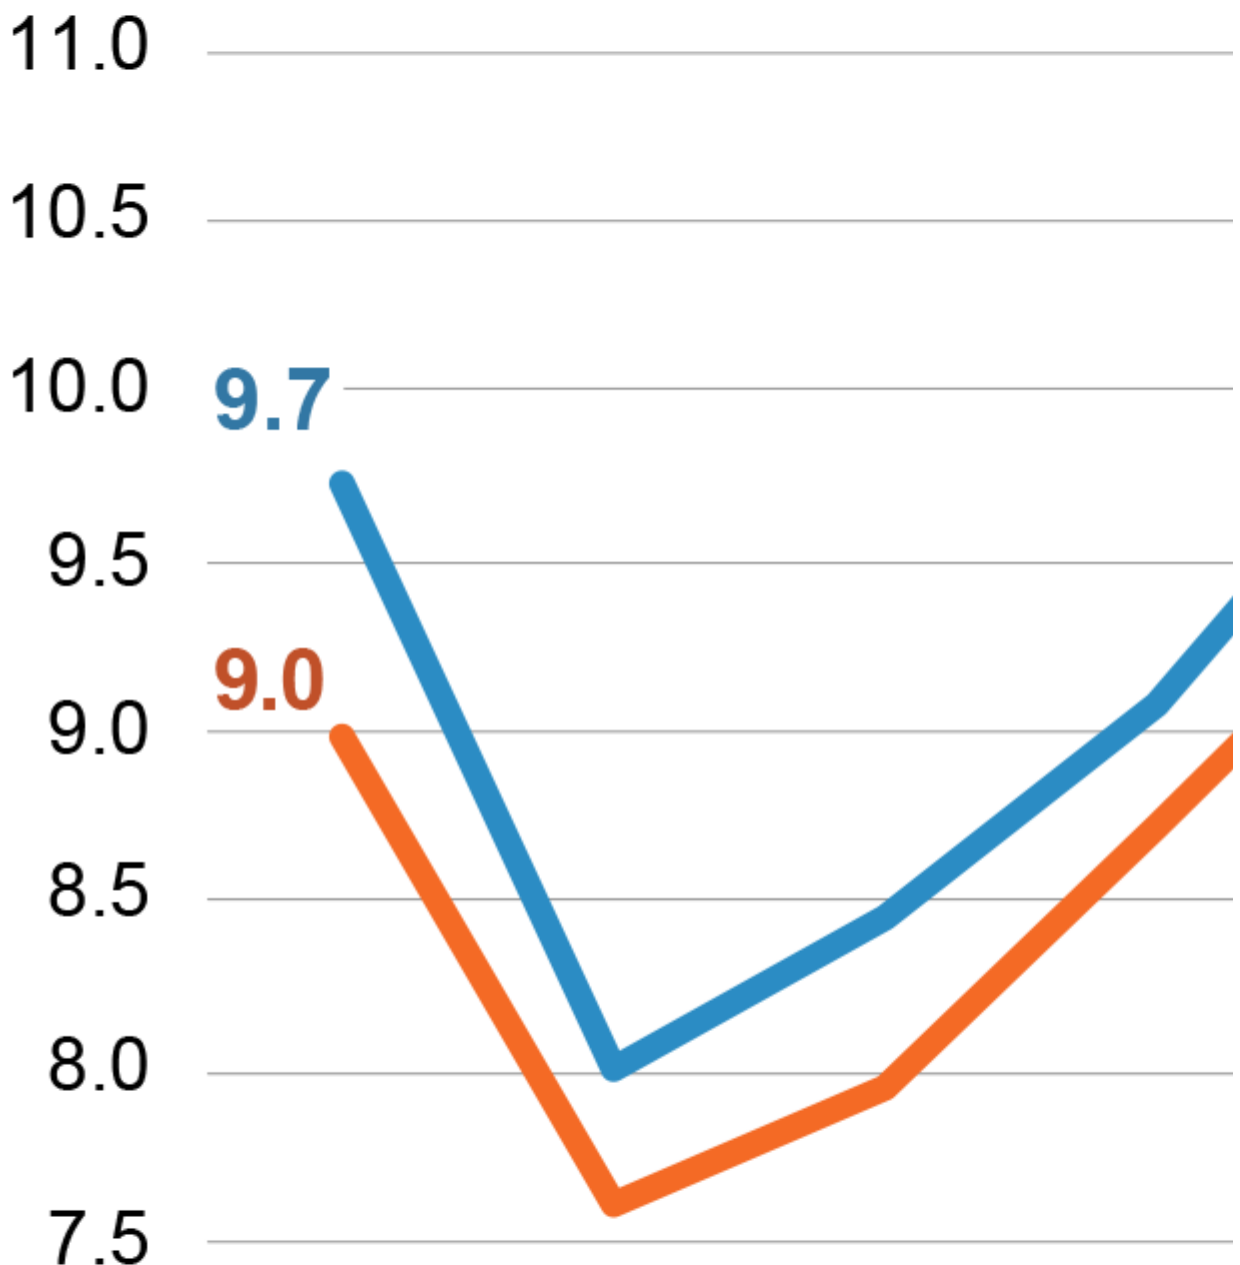

According to preliminary results, the export of goods from Slovakia reached a value of EUR 9.1 billion in June 2024¹⁾, recording a year-on-year decrease of 6.6%. Nevertheless, it was the second highest value this year. Slovakian exports recorded a year-on-year decline for the fourth time this year.

Imports of goods²⁾ decreased by 6.1% to EUR 8.4 billion. Imports recorded a year-on-year lower value for the fifth time this year. The balance of trade continued with a surplus, in June in the volume of EUR 647.4 million. In the same period last year, the balance of foreign trade ended with a surplus higher by almost EUR 100 million.
