Half a million guests visited hotels and guesthouses in Slovakia in June, the trend of faster growth in the number of foreigners continued

In June, accommodation establishments in Slovakia still lacked 11% of visitors to reach the high values of the tourist record year 2019. This applied to all SR regions except Trnavský kraj, which was the only one to already exceeding the pre-Covid level of both foreigners and residents.

The total number of visitors to hotels, guesthouses and other tourism accommodation establishments in Slovakia in June 2023 reached 543 000 people, which represented a year-on-year increase by almost 11%. In order for the accommodation establishments to reach the numbers as in the corresponding period of the year before the pandemic, the accommodation establishments still lacked 67 000 (11%) visitors. The number of nights that guests spent in tourism establishments reached 1.3 million and it was higher by 9% than a year ago. The average length of stay was 2.5 nights. The increase in accommodation indicators is still mainly influenced by the low comparative base from June 2022, when guests gradually returned to accommodation establishments after the two-year COVID-19 pandemic.
