Prices of both agricultural products and industrial producers continued decreasing, but at a significantly slower pace

The industrial producer prices for the domestic market dropped more moderately, the decline was below 10%. They continued to be affected mainly by the lower energy prices by a fifth, as well as by the continuing price drop in the most important sectors of industrial production. Although the prices of agricultural products maintained the trend of a year-on-year decreasing, after a year the drop in prices was only single-digit.

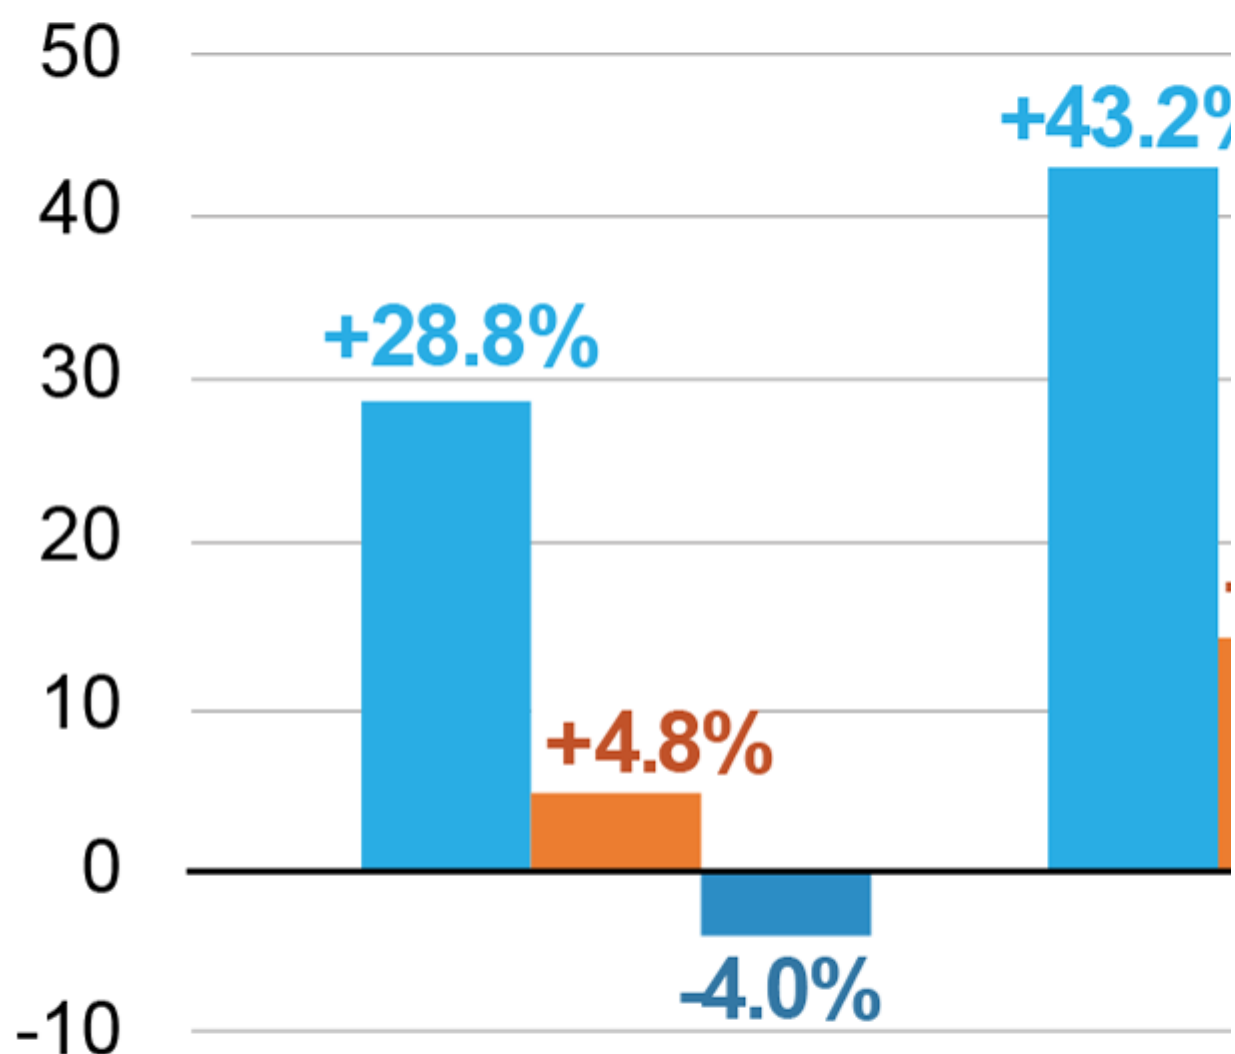

Industrial producer prices for the domestic market were lower by 9.6% year-on-year in June 2024, after four months, the drop was only single-digit. This was caused by the lower energy prices by up to 21.4%. Prices continued decreasing in the important sectors of industrial production, in manufacture of metals by 6.1%, in manufacture of food, beverages and tobacco by 2.4%, as well as in manufacture of rubber and plastic by 1.5%. After a slight year-on-year growth in the previous month, the manufacture of transport equipment remained at the same level. In a month-on-month comparison, domestic producer prices increased by 1.5%, in total for the first half of 2024, prices in industry were lower by 11.5%.

Industrial producers for the non-domestic market were lower by 1% year-on-year, they increased only slightly, by 0.1% month-on-month. In total for the first six months of 2024, industrial producer prices for the non-domestic market were lower by 2% than a year ago.
