After two fluctuating months, the production of the Slovak industry returned to the previous year's level

Even the growth in manufacture of motor vehicles and production related to energy could not significantly exceed the decline in manufacture of metals and also machinery and equipment. Lower year-on-year performance in May this year was reported by 8 out of 15 industrial sectors.

In May 2024, the industrial production¹⁾ of the Slovak Republic remained at the level of the previous year. After a significant decline in March and, on the contrary, a relatively significant growth in April, its year-on-year performance was lower by only 0.1%. In total, 8 of the 15 monitored sectors²⁾ recorded a year-on-year lower performance, including some important sectors of the Slovak industry.
