The number of people in passenger transport increased, at the beginning of 2024 their number exceeded even the pre-pandemic values

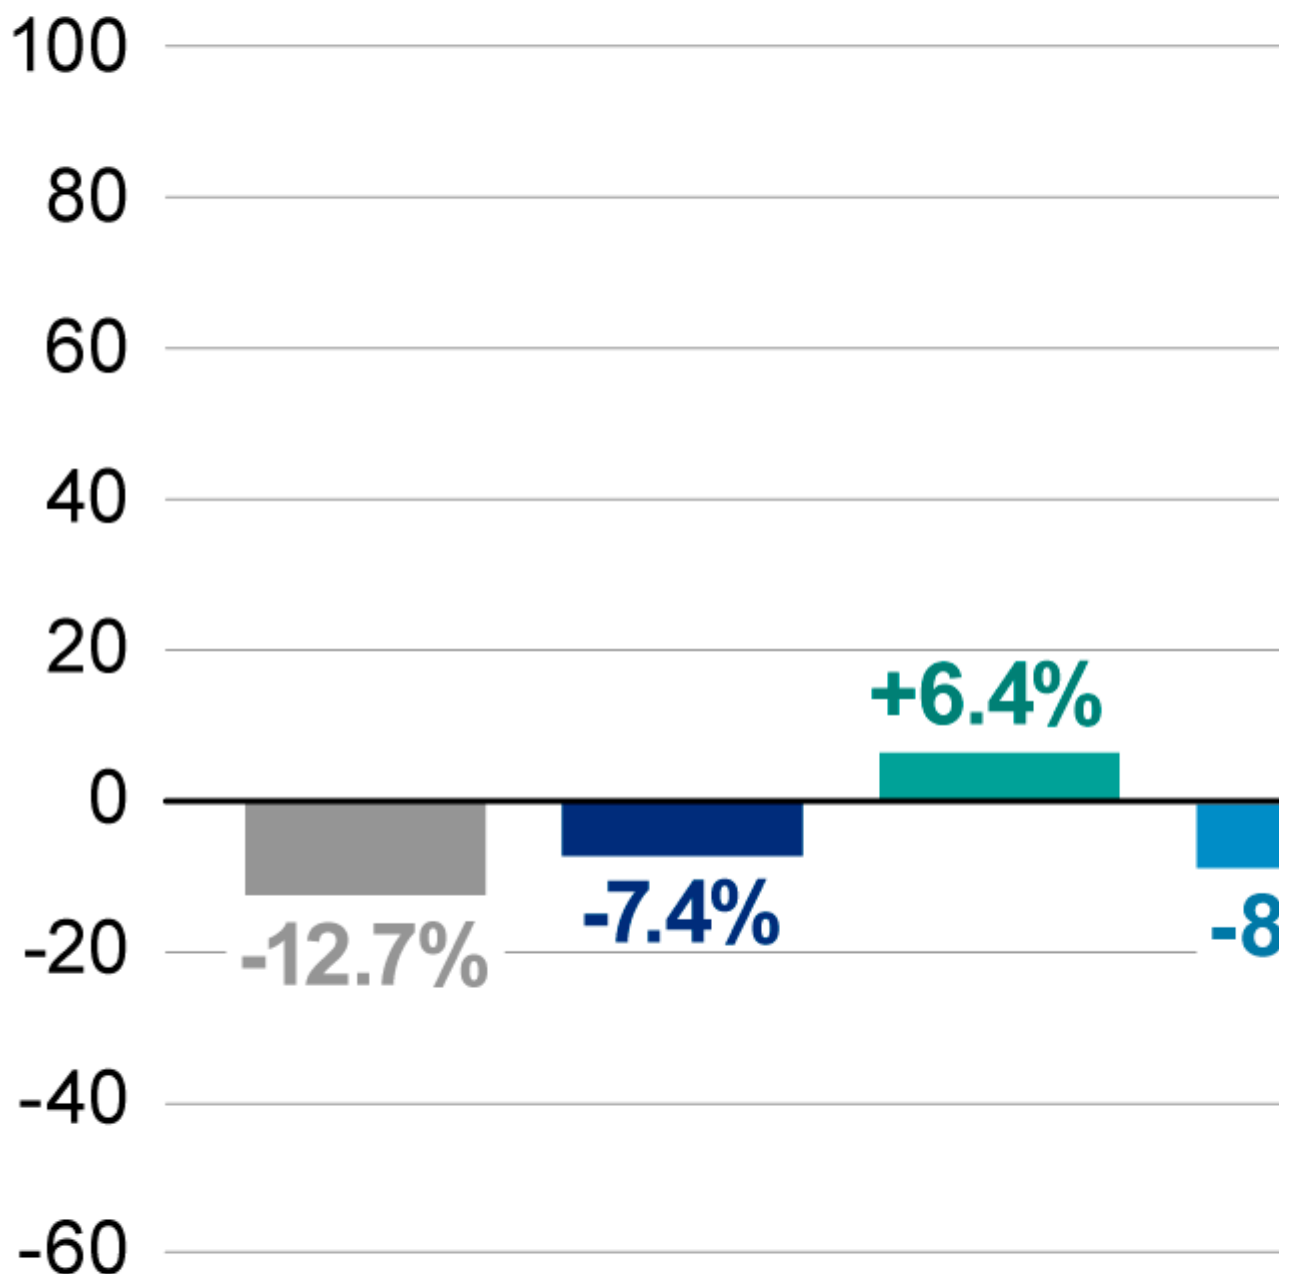

Passenger transport increased year-on-year by more than 5% in the first quarter, exceeding the pre-pandemic numbers by one percent. The number of people in urban transport reached by a fifth more than in 2019. Freight transport rose in both volume and performance, mainly affected by road transport. Higher volumes of goods transported by rail also exceeded the values of 2019.

In the 1st quarter of 2024, the number of people in **passenger transport** increased year-on-year by 5.3% and reached 178.7 million transported persons. Compared to the pre-pandemic 1st quarter of 2019, the values were higher by 1%. Decisive road transport, mostly public transport reached a year-on-year growth. Almost 117 million passengers were transported by public transport, which represented a year-on-year increase of 9%. Compared to the pre-pandemic values of 2019, the number of passengers was higher by more than 20%. Rail transport also recorded a slight increase in the number of transported persons, 17.3 million people used it in the 1st quarter, which was by 1% more year-on-year.
