
Results of the 2021 Population and Housing Census

Last update:31.05.2023

All published results of the **2021 Population and Housing Census** are available on the census website www.scitanie.sk.

The census website provides users with comprehensive data on population, houses, dwellings and households, which are processed in the form of basic, extended and geospatial data at both regional (SR, areas, regions) and local level (district, municipality, some results up to the level of basic residential units). Selected data for each municipality of the Slovak Republic can also be found in the My municipality section.

The results on the website can be viewed on web browsers Google Chrome 78+, Mozilla Firefox 68+, Microsoft Edge 79+, Apple Safari 12+, Opera 65+.

Access to the published data is free of charge and not subject to registration.
