The growth of real wages continued in May, employment also increased in most sectors

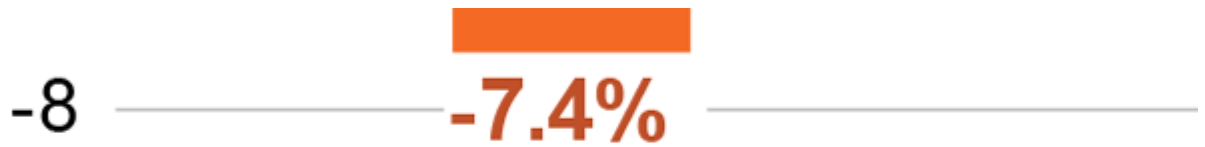

Compared to the last year, all 10 monthly monitored sectors recorded a rise in real wages, in only half of them they increased by more than 5%. Employees in transportation and storage recorded the highest improvement. Higher employment than last year was recorded in 6 out of 10 sectors, with the largest increase in selected market services. The number of employees decreased mainly in industry and food and beverage service activities.

The average nominal monthly wage^{1,2)} increased year-on-year in all 10 monthly monitored sectors in May 2024. It grew at a double-digit rate in transportation and storage by 11.1%, and in retail trade by 10.3%. For the third month in a row, all selected sectors also recorded the increase in **real wages**, which ranged from 1% in accommodation to 8.7% in transportation and storage. Retail trade, industry and sale and repair of motor vehicles also recorded more significant growth in real wages above 6%.
