Orders in industry began increasing

In April 2024, the value of new orders in industry¹⁾ increased by 5.7% year-on-year and reached a volume of EUR 5.83 billion. After seasonal adjustment, new orders increased by 13% month-on-month²⁾.

The higher volumes of April's orders in 8 of the 12 monthly monitored industrial sectors was reflected in the first year-on-year increase in new orders in industry as a whole.

In April 2024, orders increased most significantly year-on-year in manufacture of basic metals, except machinery and equipment, in manufacture of electrical equipment and in manufacture of textiles. Orders decreased significantly year-on-year, especially in manufacture of apparel, manufacture and processing of metals, and in manufacture of computer, electronic and optical products.

- 1) since the publication of data for January 2024, the entire time series of data has been recalculated due to the methodological adjustment: transition to a new base period (from 2015 to 2021); applying the principle of classifying selected indicators according to kind-of-activity units - more in the document [Change of the base period and the classification according to kind-of-activity units](#) (PDF - 268 kB)
- 2) data are seasonally adjusted by the JDemetra+ program and during the processing of each month they are adjusted back to the beginning of the time series
