The number of guests in hotels and guesthouses rose again, positively affected by increased foreign interest

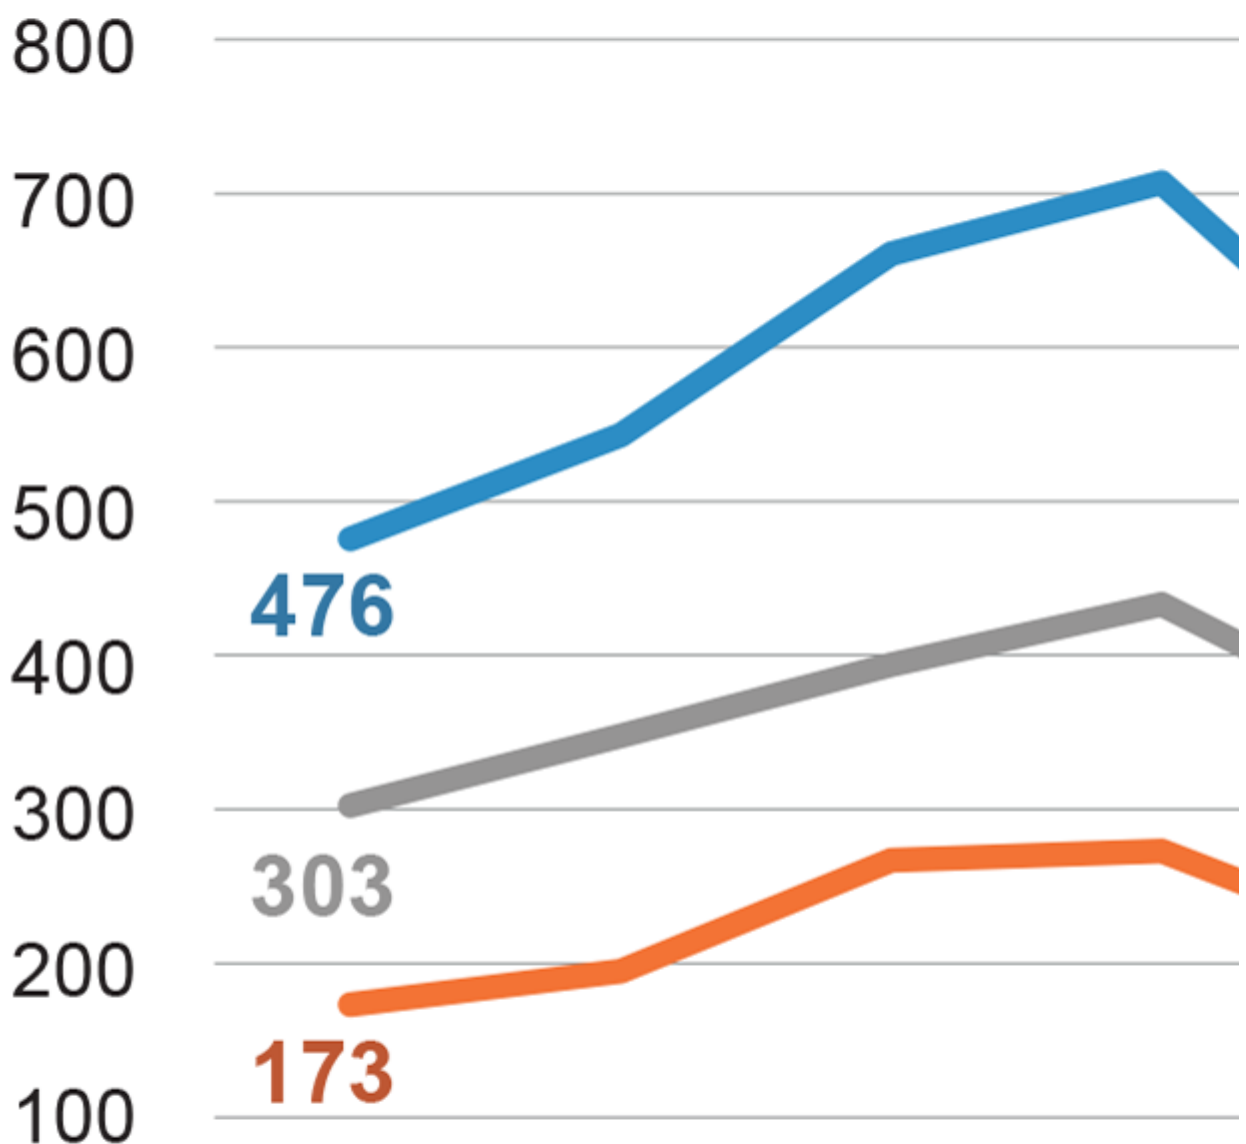

Although the visit rate at the tourism accommodation establishments increased year-on-year in May, accommodation providers still lacked 11% of guests from values of the touristically successful year of 2019. Almost all regions prospered year-on-year, mainly due to the higher number of foreign guests. The historic May's records for the number of foreign visitors were registered in Žilinský and Trnavský kraj.

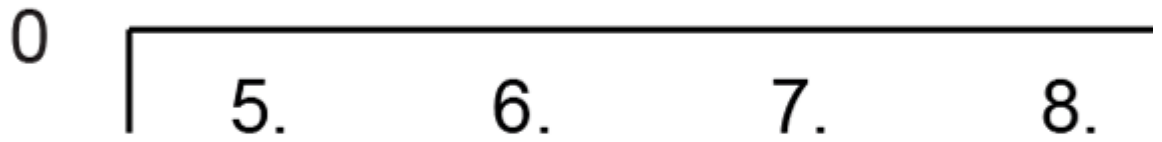

In May this year, 494,000 guests spent at least one night in hotels, guesthouses and other tourist accommodation establishments in Slovakia. The total number of visitors to accommodation establishments thus increased by 3.8% year-on-year. However, the number of visitors in hotels and guesthouses was still lower by nearly 11% than in the touristically successful year 2019. Guests spent more than 1.2 million nights in tourism establishments, the average length of stay in May was 2.5 nights.
