- The Statistical Office of the Slovak Republic creates **classifications and code lists**, ensures their harmonisation with legal acts of the European Union, international norms and international standards and publishes them on own website. The classifications and selected code lists, which are released by legal act, the Statistical Office of the Slovak Republic creates in collaboration with ministries and state organizations. The code lists and classifications are available for downloading in XML and CSV formats. The code lists marked as "**Harmonised with standards of public administration**" are harmonised with the basic code lists, which are the standards for information systems of public administration in the Slovak Republic. The basic code lists are released through central metainformation system of public administration (**MetaIS**). Ministry of Finance of the Slovak Republic maintains the list of the basic code lists in MetaIS. The Statistical Office of the Slovak Republic manages a number of basic code lists and is responsible for their maintenance in MetaIS. It maintains them also in own statistical information system in a harmonised way.
- **A correspondence table** expresses the relationship between different versions of the same classification or code list or between versions of different classifications or code lists. In the first case, the correspondence table connects the two versions of the classification or code list to catch comparability over time. In the second case it expresses the relationship between the different classifications or code lists.
- **Patterns of statistical questionnaires** for the respective survey year are being published by the Statistical Office of the Slovak Republic and ministries and state organizations to the state statistical surveys that are carried out on the base of the Programme of state statistical surveys.
- **The Programme of state statistical surveys** is a general legal act which is prepared by the Statistical Office of the Slovak Republic and ministries and state organizations. It contains statistical surveys organized and carried out by the Statistical Office of the Slovak Republic and ministries and state organizations. The Statistical Office of the Slovak Republic releases the Programme of state statistical surveys in the Collection of legal acts of the Slovak Republic.
- **A vocabulary** is an ordered set of concepts recorded in writing. The concept is unique name of particular object that is the subject of perception (things, methods, ideas, etc.) along with its definition and other attributes describing the concept. Thus the concept enables clear communication between statisticians and users of statistics.
- **Quality reports** provide information about the quality of key macroeconomic data and indicators of national accounts in terms of methods, processes and resources used in the compilation.
