3 Popis štatistiky

3.1 Popis údajov

The quarterly survey contains basic data on dwellings according to their construction stage, structure
dwellings, their floor area according to the number of rooms, building permits and occupancy permits.
The main indicators of the survey are:
- dwellings under construction as at 1.1.
- dwellings started
- completed dwellings
- useful area of completed dwellings
- decreases in dwellings
- number of building permits
- number of occupancy permit decisions

3.2 Klasifikačný systém

Branch Classification of Economic Activities (SK NACE Rev. 2) - Branch Classification of Economic Activities - NACE rev.2
Classification of statistical territorial units - Nomenclature of territorial units for statistical purposes - NUTS 2010
Classification of building types (CC)

3.3 Pokrytie štatistických oblastí a okruhov

Municipality
3-digit CC level

3.4 Štatistické pojmy a definície

Completed dwellings are those that were passed as acceptable by an approving officer after construction completion. It refers to completed dwellings in constructions intended for living, i.e. in housing buildings, family houses and in polyfunctional buildings. There are included also dwelling in constructions undisposed for living, for example in administrative buildings, banks, posts, stations. Completed dwellings refer to dwellings acquired by new construction, improvements or another construction repairs.

Average living area of completed dwelling expresses housing space (m^2) per one completed dwelling.

Useful floor area of completed dwelling is the area of all rooms of completed dwelling. There are not included common non-housing space serving for all users of dwelling (staircase) and non-housing rooms used by dwellings users (cellars, room for prams, common laundry) and balconies or loggias.

Decrease of dwellings is represented by decrease of existing dwelling number on the base of given decision of construction offices on their extinction (demolition, abolition or change of utilization).

Building permits is a permit to start work on a construction project. The variable shall be compiled on the basis of the permits issued for new residential and two-dwelling residential buildings. Living space is a room or hall of rooms with internal accessories arranged in a functional unit with its own enclosure, intended for housing.

3.5 Štatistická jednotka

Municipalities

3.6 Cieľová populácia

Approximately 3,000 municipalities are included.

3.7 Geografické pokrytie

The survey covers all regions of the Slovak Republic. Reporting agents are resident in the territory of the Slovak Republic and provide data on their domestic activities and activities outside them if the activities performed are subject to tax and other obligations in relation to Slovak legislation.

3.8 Časové pokrytie

Time series since 2004

3.9 Bázické obdobie

Not apply

4 Merná jednotka

Absolute data shall be transmitted to Eurostat.

5 Referenčné obdobie

quarter

6 Inštitucionálny mandát

6.1 Právne akty a iné dohody

Act no. 540/2001 on state statistics as amended and supplemented by other regulations.
The obligation to provide data is specified in the Statistical Act and its provisions (Program national statistical surveys).

6.2 Spoločné využívanie údajov

The required variables have been transmitted to Eurostat since 2003.

7 Štatistická dôvernosť

7.1 Politika štatistickej dôvernosti

The confidentiality of statistical data is laid down in Act No. 540/2001 Coll. On State Statistics, v as amended, § 30.

Methodological Directive on the use of the regional statistics warehouse.
On the website of the SO SR are available:
• statistical questionnaire forms in the national version, including methodological notes;
• methodological sheets (description of detailed statistical indicators) in the national version.

10.7 Dokumentácia o kvalite

Methodological Guidelines Quality Indicators of Statistical Outputs and Processes (MET-2/2012) a Application of mathematical-statistical methods for statistical surveys (MET-3/2012) is available for the creation of statistical data.
Quality reports are currently being drawn up, if required by European regulations in accordance with ESS Quality Report (EQHQR).
The quality reports are integrated into the new Integrated Statistical Information System ISIS and updated internal guidelines on value-added processes.

11 Riadenie kvality

11.1 Zabezpečovanie kvality

The quality policy is defined and made available to the public in:
- Quality statement and quality policy.
- The quality manual covers all elements of ISO 9001: 2008.
There are defined internal guidelines on the value added processes supported managerial processes.
The European Statistics Code of Practice is the backbone of the whole SMK

11.2 Hodnotenie kvality

At present, each statistical survey is processed into an integrated statistical survey the information system (IIS), including all necessary data entry issues, completeness of data and statistical controls. This process is organized by specialized workplaces Statistical Office of the Slovak Republic. Cross-checking is carried out in the context of the statistical process control. Comparisons with developments in previous periods are made.

12 Relevantnosť

12.1 Potreby používateľov

Users are consulted in the form of cooperation with other organizations (ministries and other state organizations) in the preparation of the Program of State Statistical Surveys. In practice, users are consulted on a bilateral basis as well as in the framework of activities, covered by the action program. Learning to learn about key expectations users, and to promote better interpretation and use of statistical products.
Key users of specific product statistics are listed in the marketing plan:
• international organizations - Eurostat, OECD.
• National institutions - Ministry of Transport and Regional Development of the SR, National Bank Slovakia.

12.2 Spokojnosť používateľov

The housing sector is not specifically assessed

12.3 Úplnosť štatistických informácií

Quarterly time series have been available since 2004.

13 Presnosť a spoľahlivosť

13.1 Celková presnosť

Irregularities are consulted directly with the reporting units at our workplace in Košice

13.2 Výberové chyby

is not relevant

13.3 Nevýberové chyby

14 Včasnosť a dochvíľnosť

14.1 Včasnosť

Data are released at national level and transmitted to Eurostat approximately. 65 days after reference
quarter.

14.2 Dochvíľnosť

All deadlines were respected.

15 Porovnateľnosť a koherentnosť

15.1 Geografická porovnateľnosť

The same statistical concepts apply to the whole area of the Slovak Republic.

15.2 Porovnateľnosť v čase

Data in time series are comparable over time.

15.3 Prierezová koherentnosť

15.4 Vnútorná koherentnosť

There are no problems with internal consistency

16 Náklady a záťaž respondentov

17 Revízia údajov

17.1 Politika revízií

Revisions are in accordance with ROZ-3/2018 Revision Policy of the SO SR.
The same revision policy shall apply to JTS data released at national level and transmitted to Eurostat.
According to the revision policy of the SO SR, the revised data are accompanied by all necessary data explanations (reasons, character, etc.) And are accessible through the SO SR portal.
Revision rules and revision calendar of the SO SR as well as all necessary explanations are accessible via the SO SR portal.

17.2 Revízia údajov v praxi

The primary source of current revisions is the need for data revisions as a result of the data available
from quarterly surveys received from reporting agents or corrected data from
reporting units.

18 Štatistické spracovanie

18.1 Zdrojové údaje

Municipalities provide data on a quarterly basis.

18.2 Periodicita zberu údajov

Quarterly

18.3 Zber údajov

Data collection is organized by the Office of the SO SR in Košice. Data should be submitted by On the 12th calendar day after the end of the reference period

18.4 Validácia údajov

Data input, data completeness and statistical control are performed at the SO SR workplace.
Two levels of control:
1. formal checks that are automatically carried out in the data entry process
2. informal checks aimed at checking the relationships between variables
Two basic types of informal controls are classified according to importance:
I - Informative control - This control provides additional information that is important to the the following repair process. It also informs about some irregularities in the fulfillment of the questionnaire, o
unresponsive item, exceeded limits, etc.
Z - check of great importance - usually the exact error is checked and must always be corrected or explained.
Most of the errors are consulted directly with the reporting units of the SO SR

18.5 Spôsob spracovania údajov

Basic data are available at the three-digit CC level and then aggregated to the required level CC level. Aggregated data broken down by ownership and
region.

18.6 Úprava údajov

19 Poznámka
