

Searching for information in the Statistical Yearbook of the Slovak Republic:

Searching for data from a specific area – searching by chapters

- select the area you are interested in and open it
- the individual chapters belonging to the given statistics area are displayed
- go to the required chapter
- open the file with tables, the first sheet contains a list of all tables forming the chapter with hyperlinks, on the other sheets with the table designation, you will find data for individual indicators
- each chapter contains a file with methodological explanations, definitions of individual statistical indicators and information about the sources of published data
- most chapters also contain visualizations and graphs of selected indicators

Searching for data by password

- open the item Register
- the passwords that appear in the tables are displayed in alphabetical order
- find the required password
- for each password you will find the designations of the tables in which the password is located (e.g. T20–16: T means that it is a table, 20 represents the chapter number, 16 is the order of the table in the chapter)
- find the table (e.g. T20–16) in particular chapter (e.g. the chapter 20. Trade, Catering , Accommodation is located in the Sectoral Statistics), after opening the chapter select the file with tables and search for the table by the content with hyperlinks or by the table code on the sheets (e.g. table T20–16 is located on the sheet T20–16).
