

25. MANAGEMENT OF NON-FINANCIAL AND FINANCIAL CORPORATIONS

Methodological notes

This chapter includes data on non-financial and financial corporations.

Non-financial corporations are entrepreneurial entities registered in the Business Register running business to make profit in all areas of economic activity except banking and insurance. Subsidized organizations covering their expenditures by more than 50% of revenues are also included. Those enterprises which are not corporations (households, tradesmen, freelancers and self-employed farmers) are excluded.

Financial corporations are entities, which realize especially financial intermediation and supporting financial activities. The financial corporations sector includes the National Bank of Slovakia, commercial banks, financial leasing companies, exchange offices, asset management companies, commercial insurances, mutual funds, etc.

For more detailed breakdown by economic activities is applied the Statistical Classification of Economic Activities SK NACE Rev. 2.

Definitions

Costs for particular period present the sum of costs on operation, financial transactions and extraordinary costs.

Profit/loss expresses the result of economic activity of reporting unit for the reference period. It is calculated as a subtraction of revenues from expenditures and has character of profit or loss. For statistical purposes it is given before taxation.

Source

Published data for the branch of non-financial and financial corporations are the result of the statistical surveys of the SO SR. More detailed information can be obtained in the public database of the SO SR DATAcube.
