## Notice

Unless otherwise specified in the heading or a legend to the table, the area the data refers to (country, region, etc.) is the territory of the Slovak Republic.

Unless the name of the table or the note under the table contains the size of published data, this is the data on the whole economy of the SR (including imputation for the organization of up to 19 employees, tradesmen, or the whole population).

As to the data published according to certain classifications (for example Statistical Classification of Economic Activities, Standard International Trade Classification, etc.) the names of indicators in English do not always correspond to literal names in Slovak language, but they are given according to the international classification, or an abbreviation is used.

The names of the countries are abbreviated, not always in official version.

Differences in sums and ratios result from rounding the data. Unless explicitly stated, the published data are definitive.

## Explanations to symbols

Macron (–) the phenomenon did not occur

Zero (0; 0,0; 0,00) denotes greater than zero but less than the smallest unit expressible in the table
