TOURISM DIRECT GROSS VALUE ADDED IN THE SLOVAK REPUBLIC

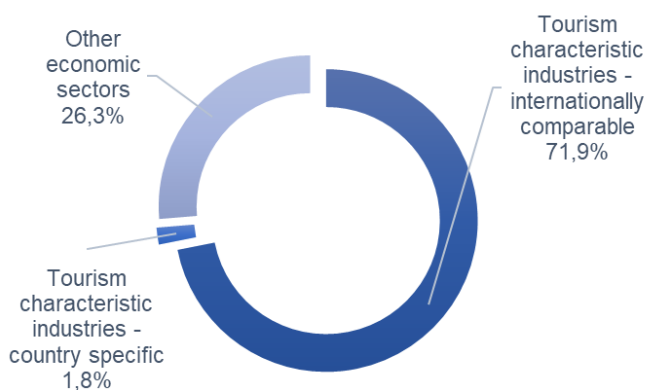

In the reference period, the tourism direct gross value added (TDGVA) amounted to EUR 1,09 bil. EUR. It contributed by 1,36 % to the total gross value added (GVA) of the economy.

The share of tourism direct gross value added in the gross value added of the economy in 2020

The tourism direct gross value added was attributed to the tourism characteristic industries – internationally comparable of 71,9%, tourism characteristic industries – country specific of 1,8 % and 26,3 % was made up of other economic sectors.

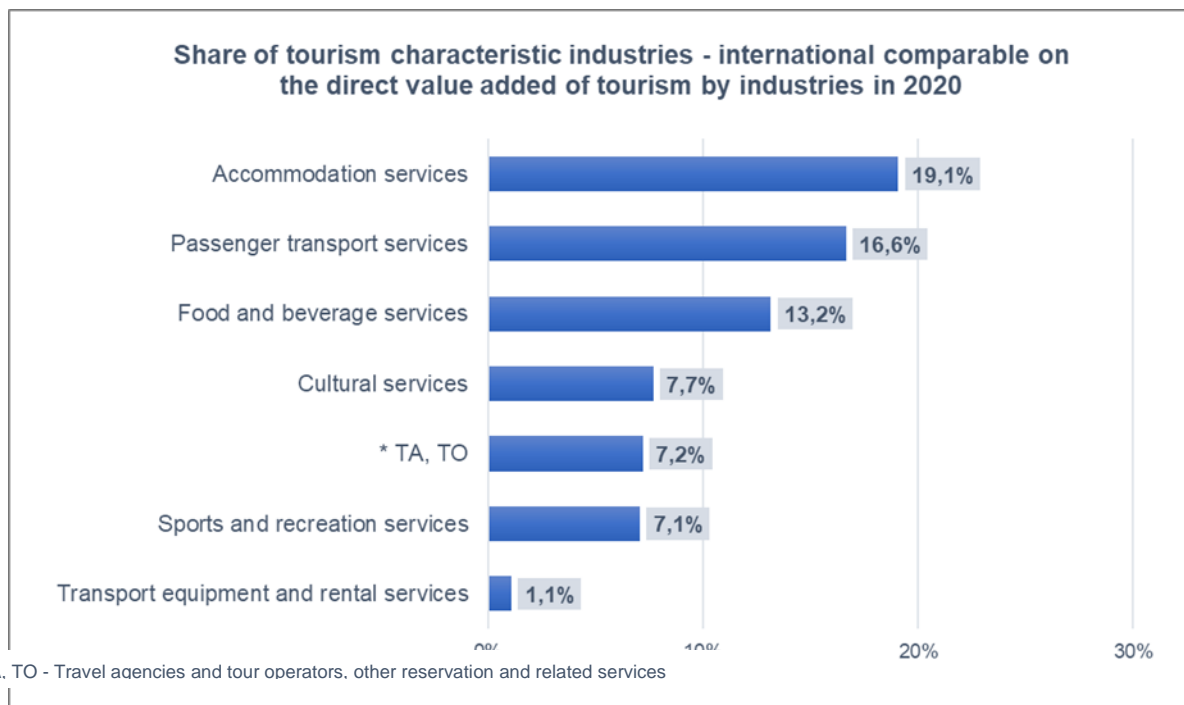

The share of industries in tourism direct gross value added in 2020

In tourism characteristic industries – internationally comparable, accommodation services (19,1 %), the passenger transport services (16,6 %), food and beverage services (13,2 %), cultural services (7,7 %) and travel agencies and other reservation services (7,2 %) contributed the most to the creation of tourism

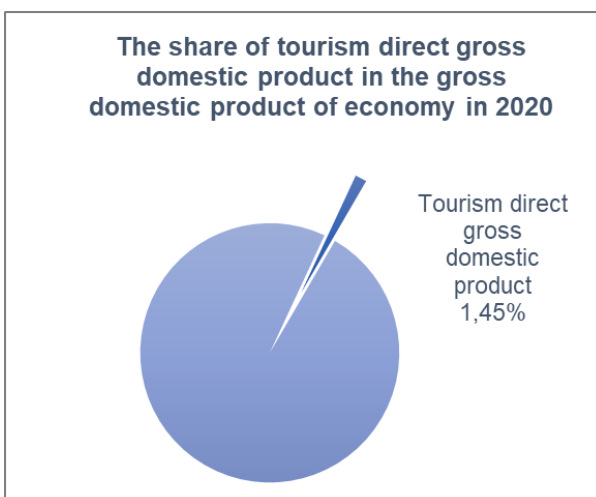

direct gross value added, followed by sports and recreation services (7,1 %) and transport equipment and rental services (1,1 %).

TOURISM DIRECT GROSS DOMESTIC PRODUCT

The tourism direct gross domestic product is part of the gross domestic product of economy. It is calculated as a sum of tourism direct gross value added and net taxes on tourism products (taxes on products less subsidies on products, which were included in the consumption of tourism products).

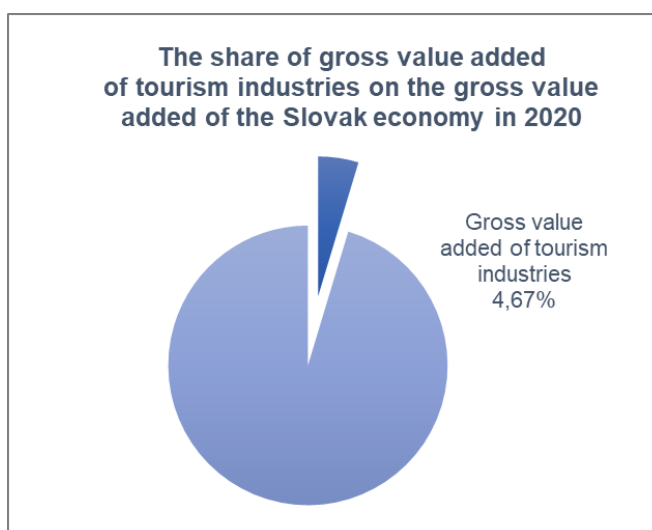

In 2020, the tourism direct gross domestic product reached almost EUR 1,3 bil. EUR. which represented a 1,45 % share on the GDP of the Slovak economy.

Net taxes on products accounted for 16,1 % and the direct value added of tourism 83,9 % of the tourism direct gross domestic product.

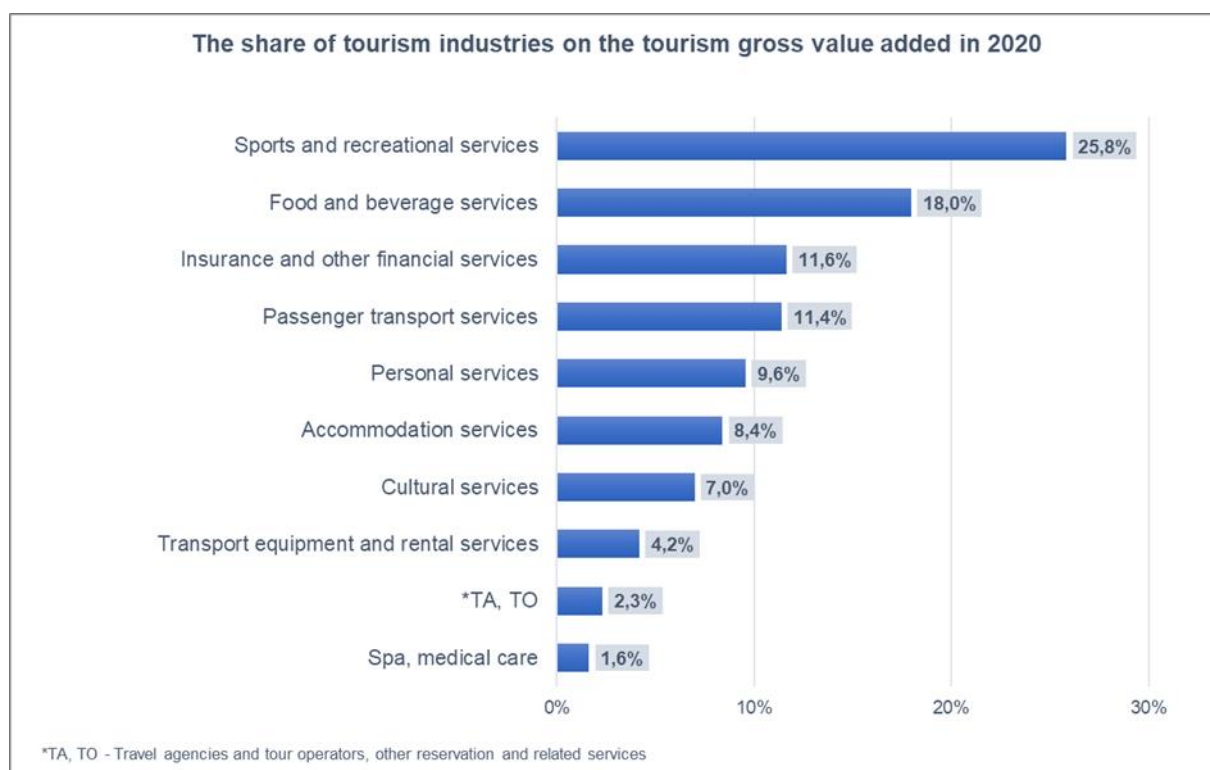

GROSS VALUE ADDED OF TOURISM INDUSTRIES IN THE SLOVAK REPUBLIC

The gross value added of tourism industries includes the gross value added for all its activities, whether or not they are part of the tourism industry and whether they directly serve visitors.

The tourism characteristic industries in the SR together with country specific tourism industries reached a gross value added of EUR 3,76 bil. EUR during 2020. It represented 4,67 % share of the total value added of the Slovak economy.

During the reference period, tourism characteristic industries – internationally comparable, generated gross value added in the amount of EUR 2,9 bil. which is a 77,1 % of the total value added of tourism industries. The tourism characteristic industries – country specific, contributed by EUR 0,86 bil. to the total value added which is by 22,9 % of the total value added of tourism industries.

In the tourism characteristic industries – internationally comparable, the sports and recreational services had the highest share on the gross value added of tourism industries, followed by food and beverage services and passenger transport services.

Within tourism characteristic industries – country specific, insurance and other financial services accounted for the highest share on the gross value added of tourism industries.

TOURISM EXPENDITURES

In 2020, visitors spent almost EUR 2,15 bil. in domestic, inbound and outbound tourism of the SR. Non-residents of the SR who were on the territory of the SR in their leisure time, on recreation or on a business trip for less than 1 year, spent

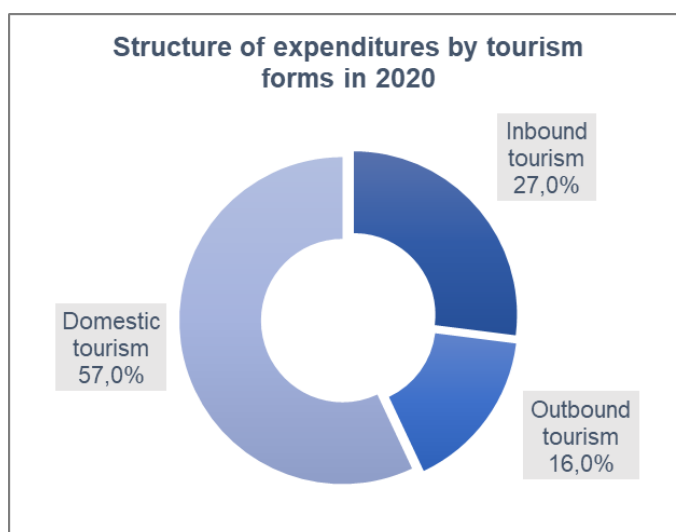

in 2020, in the SR, EUR 579 mil. thus contributing to the total tourism expenditures by 27 %.

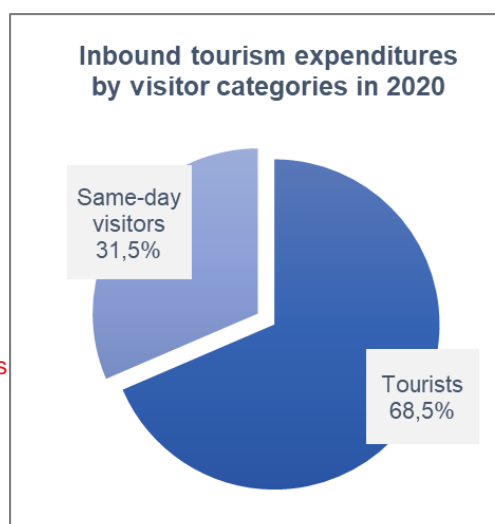

The Slovak residents incurred expenditure in the amount of EUR 1,22 bil. representing 57 % of the total tourism expenditures. The afore-mentioned expenditures include not only the expenditures of the SR residents on domestic trips but also a part of the visitors' expenditures on outbound tourism, occurring in relation to these foreign trips before their realization in the territory of the Slovak Republic.

Within the outbound tourism of the SR residents, i.e. foreign trips for leisure, recreation or business for a period less than 1 year, the SR residents spent money in the amount of EUR 344 mil. EUR.

In terms of the overall structure of expenditures by the forms of tourism (domestic, inbound, outbound) the domestic tourism accounted for 57 % of total expenditure, followed by inbound tourism (27 %) and outbound tourism (16 %).

In inbound tourism, tourists (visitors with overnight stay) accounted for the vast majority of expenditures (68,5 %). Same-day visitors

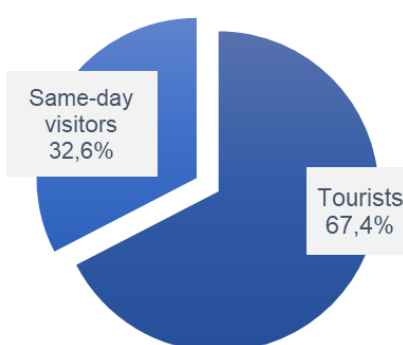

(visitors without overnight stay) accounted for 31,5 % of expenditures.

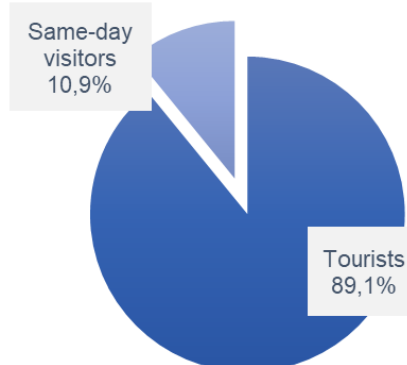

In domestic tourism similarly as in inbound tourism, the most significant part of expenditures concerned tourist expenditures (67,4 %). In the reference period, the expenditures of same-day visitors represented 32,6 % of the total expenditures of domestic tourism.

**Domestic tourism
expenditures by visitor
categories in 2020**

Similarly in outbound tourism, tourist expenditures accounted for the predominant part of total expenditures on inbound tourism, in the amount of 89,1 %. Same-day visitors represented 10,9 % of the total expenditures of outbound tourism.

**Outbound tourism
expenditures by visitor
categories in 2020**

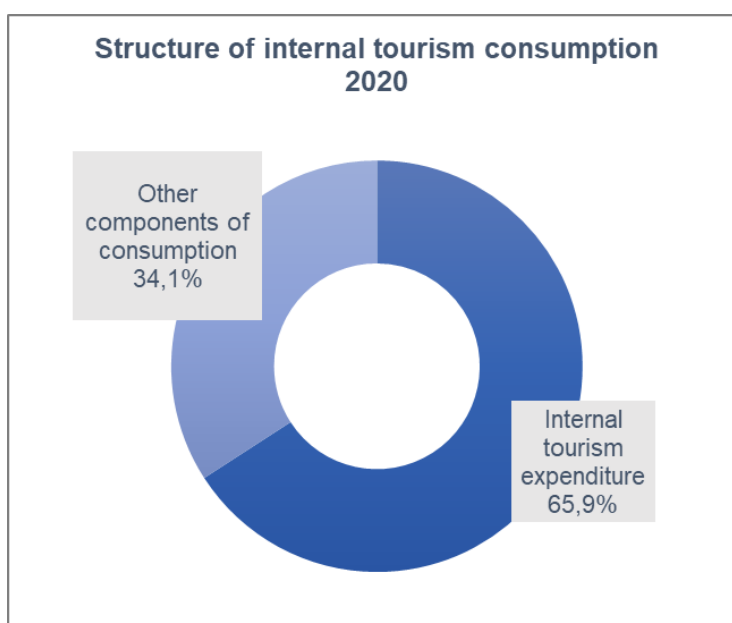

INTERNAL TOURISM CONSUMPTION

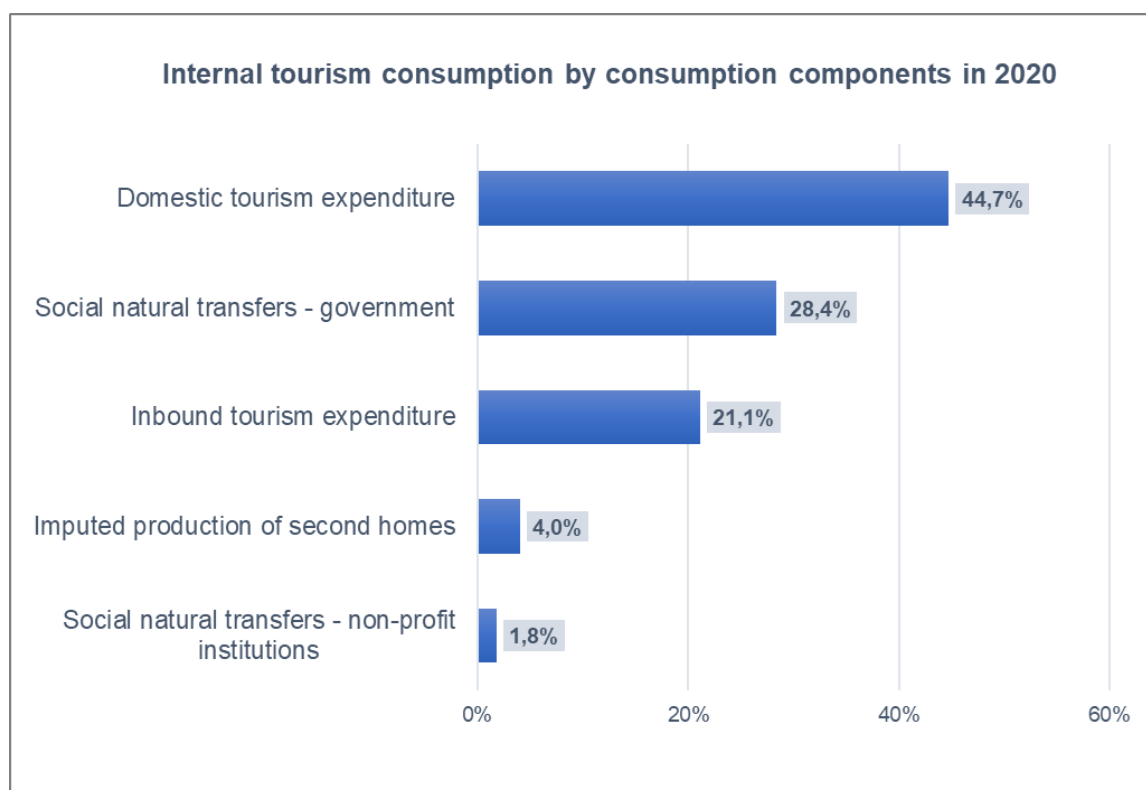

Internal tourism consumption is a broader concept than the tourism expenditure indicator. Inbound and outbound tourism expenditure data are entering the consumption which together make up the total expenditures on in-bound tourism of the Slovak Republic. The above mentioned expenditures represent the cash payments of residents

and non-residents in the territory of the SR. In addition to these cash payments, the consumption in the SR also includes non-cash payments of visitors which are referred to as other components of internal tourism consumption in the TSA methodology.

In the conditions of the SR, they include imputed production of second homes related to accommodation in holiday homes. Another item comprises social natural transfers in kind related to government and non-profit organizations serving households NPISHs (individual non-market services) provided to visitors free of charge or at economically insignificant prices, e.g. health, museum activities, recreational and sports activities.

EMPLOYMENT IN TOURISM INDUSTRIES

In 2020, tourism industries had almost 171 thousand occupied posts¹ of which 83,5 % were employees and 16,5 % self-employed (natural persons)². In tourism industries, there were almost 241 370 thousand hours worked, of which 80,2 % were of employees and 19,8 % of self-employed.

In the reference period, the average number of hours worked of employees represented 113 hours and of self-employed 142 hours per month.

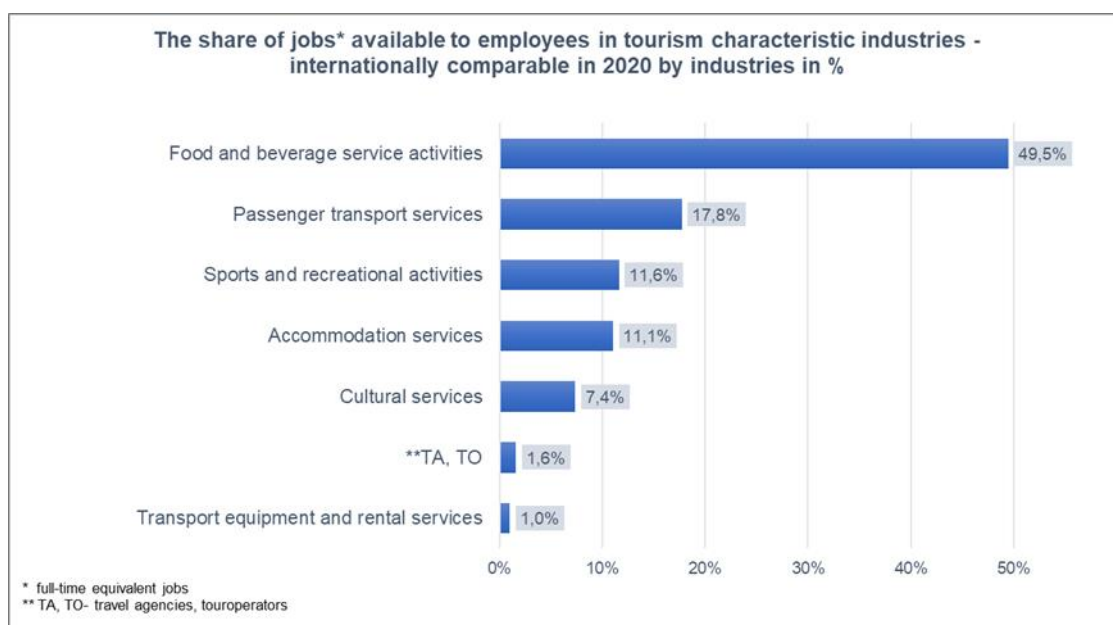

In 2020, tourism characteristic industries – internationally comparable, provided 127,4 thousand FTE jobs for employees and 15,1 thousand FTE jobs for entrepreneurs⁴.

¹ Refers to a number of jobs recalculated for full-time equivalent jobs (FTE)

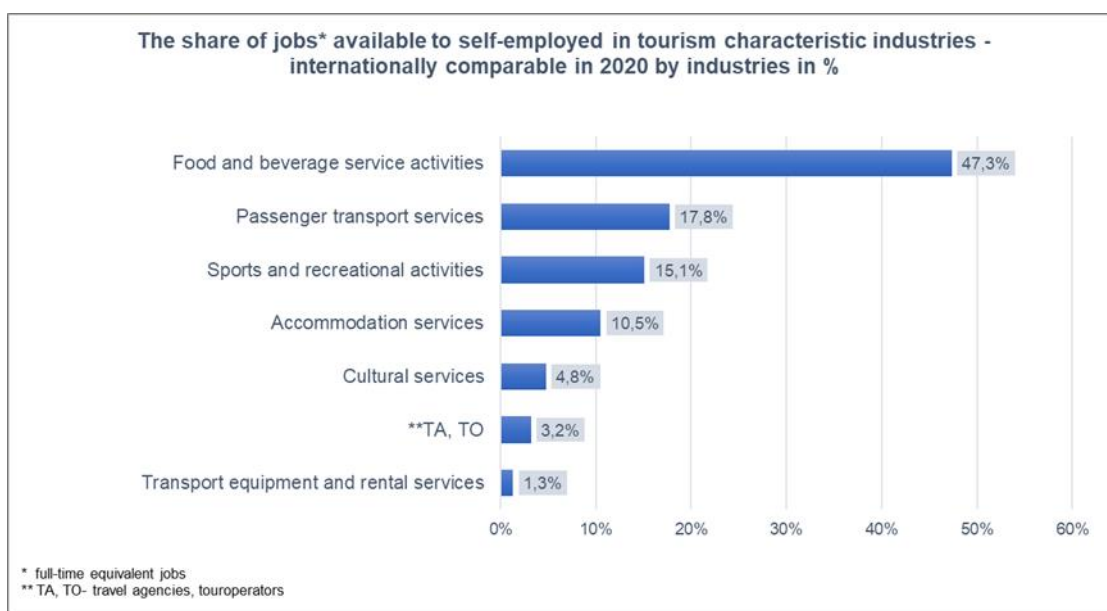

² Refers to the self-employed persons
