## ZVEREJŇOVANIE VYBRANÝCH ÚDAJOV ŠTATISTICKÉHO ÚRADU SR

Kalendár prvého zverejnenia vybraných údajov Štatistického úradu SR je dostupný na internetovom portáli [www.statistics.sk](http://www.statistics.sk). Všetky upresnenia termínov za kategóriu Indexy cien poľnohospodárskych výrobkov v SR sú zverejnené na uvedenom internetovom portáli vopred.

## RELEASE OF SELECTED DATA OF THE STATISTICAL OFFICE OF THE SR

Calendar of the first release of selected data of the Statistical Office of the SR is available on the Internet portal [www.statistics.sk](http://www.statistics.sk). All amendments of deadlines for the category of Producer price indices of agricultural products in the Slovak Republic are published on the given Internet portal in advance.

## METODICKÉ VYSVETLIVKY

V roku 2018 uskutočnil Štatistický úrad Slovenskej republiky na základe rozhodnutia Eurostatu revíziu cenových indexov poľnohospodárskych výrobkov, ktorá spočívala v :

- zmene bázičného obdobia (predtým rok 2010, od roku 2018 rok 2015= 100),
- zmene váhového systému (predtým na základe mesačného priemeru tržieb za roky 2009 - 2011, súčasne na základe mesačného priemeru tržieb za roky 2014 - 2016),
- aktualizácii a rozšírení počtu respondentov na cca 500.

Ceny poľnohospodárskych výrobkov sa zisťujú mesačne štátnym štatistickým výkazom Ceny Poľ NC 1 - 12 vo vybranom súbore poľnohospodárskych výrobcov bez ohľadu na formu vlastníctva (organizácie družstevné, štátne i súkromníci).

Pre zisťovanie cien boli vybrané hlavné poľnohospodárske výrobky v určených akostných triedach. Vo výkaze sú zahrnuté rastlinné výrobky vrátane ovocia a zeleniny a živočíšne výrobky vrátane rýb.

Ceny sa zisťujú ako nevážené aritmetické priemery všetkých dôležitejších obchodných prípadov organizácie, ktoré sa vyskytnú v sledovanom období až do odoslania výkazu. Ceny sa uvádzajú bez dane z pridanej hodnoty. Okrem toho sa výkazom zisťuje aj množstvo a hodnota predaja vybraných reprezentantov za všetky akosti úhrnom (bez neštandardov a nutných porážok) za celý predchádzajúci mesiac. Uvedené dáta sú podkladom pre výpočet priemerných hodnôt.

Priemerné ceny sledovaných poľnohospodárskych výrobkov sa vypočítavajú ako aritmetický priemer individuálnych cien jednotlivých výrobcov za SR, resp.kraje.

Cenové indexy sa vypočítavajú zo zistených cien 85 vybraných výrobkov - cenových reprezentantov. Jednoduché indexy sa agregujú pomocou stáleho mesačného váhového systému do skupín a úhrnu podľa Laspeyresovho vzorca:

$$I = \frac{\sum \frac{p_1}{p_0} \cdot p_0 q_0}{\sum p_0 q_0} \cdot 100$$

$p_1$  - cena sledovaného obdobia

$p_0$  - cena základného obdobia (cena jednotlivých mesiacov roka 2015)

$p_0 q_0$  - stála váha - odvodená z hodnoty predaja základného obdobia (priemer rokov 2014 - 2016) v relatívnom vyjadrení

## METHODOLOGY NOTES

In 2018, based on the respective decision of EUROSTAT, the Statistical Office of the Slovak Republic undertook a revision of the price indices of agricultural products, which consisted of:

- moving the reference period (to the year of 2015, from 2018 onwards, before prices were compared with the year 2010),
- changing the weighting system (before it was based on monthly averaging of turnovers for 2009-2011, now the period 2014-2016 is applied),
- updating, and extending the number of respondents to about 500.

Prices of agricultural products are surveyed on a monthly basis by using the official statistical form "Ceny Poľ NC 1-12" for selected agricultural products, for all types of business ownership (i.e. co-operatives, state-funded organizations, as well as private sole-proprietors).

Only the main agricultural products in specified quality categories were selected for price survey. Crop products including fruit and vegetables and animal products including fishes are included in the questionnaire.

The prices are surveyed as a non-weighted arithmetic average of prices of all major business cases of a given organization, which were registered in the calendar month. The price presented does not include VAT. Besides this, the respective official survey collects information on sales, in terms of quantity and value of selected price representatives for all quality categories (excluding inferior goods and emergency slaughtering), as an aggregate for the whole previous month. These data are then imputed into the calculation of average values.

Average prices of the monitored agricultural products are calculated as an arithmetic average of prices offered by individual producers, for the country as a whole, or at the level of regions.

Price indices are calculated based on prices reported for 85 selected products – price representatives (samplers). Simple indices are then aggregated into groups and totals, through the constant monthly weighting system, following Laspeyres formula:

$$I = \frac{\sum \frac{p_1}{p_0} \cdot p_0 q_0}{\sum p_0 q_0} \cdot 100$$

$p_1$  - price in the monitored period,

$p_0$  - price in the reference period (i.e. prices for individual months as reported in 2015),

$p_0 q_0$  - the respective weight, derived from the value of sales registered in the reference period (average of the 2014-2016 period), in relative terms

## KOMENTÁR K VÝVOJU CIEN V FEBRUÁRI

Vo februári boli ceny poľnohospodárskych výrobkov medziročne vyššie o 2,1 %. Ceny rastlinných výrobkov vzrástli o 8,6 %. Ceny živočíšnych výrobkov klesli o 3,5 %.

Z rastlinných výrobkov vzrástli ceny obilnín o 11,4 %, ceny olejnatých plodov a semien o 8,9 %, ceny strukovín 6 % a ceny ovocia a zeleniny o 2,4 %. Klesli ceny zemiakov o 17,5 %.

Zo živočíšnych výrobkov sa zvýšili ceny jatočných oviec a jahniat o 4,4 %, ceny konzumných slepačích vajec o 1,4 % a ceny hovädzieho dobytku vrátane teliat o 1,7%. Znížili sa ceny surovej ovčej vlny v pote o 31,4 %, ceny jatočných ošípaných o 7,8 %, ceny živých rýb o 3,5 %, ceny surového kravského mlieka o 0,8 % a ceny jatočnej hydiny o 7,1 %.

Od začiatku roka vzrástli ceny poľnohospodárskych výrobkov v priemere o 0,6 % vplyvom vyšších cien rastlinných výrobkov o 0,5 % a nižších cien živočíšnych výrobkov o 3,4 %.
